

Conference Announcement Irrigation & Drainage Awards 2021

Mojtaba Mafi*

Physician, Tehran University, Iran

We are pleased to welcome you to the "Health Economics and Healthcare Management" after the successful completion of the series of Healthcare Management Congress. The congress is scheduled to take place in the beautiful city of Rome, Italy on October 12-13, 2020. Health Management-2020 conference will provide you with an exemplary research experience and huge ideas. The perspective of Health Management-2020 Conference is to set up research to help people understand how treatment techniques have advanced and how the field has developed in recent years. Healthcare Management is the profession that provides leadership and direction to organizations that deliver personal health services, and to divisions, departments, units, or services within those organizations. Health services managers who coordinate care are responsible for creating work schedules for healthcare providers, coordinating the delivery and quality of services provided by providers or provider's teams, monitoring capacity and usage of healthcare facilities. The primary responsibility of health care managers is to foster an environment that can provide necessary and quality health care at maximum profit. They determine budgets, order and receive supplies, administer payroll and benefits, and distribute regular communications. Public health economics play a leading role in optimizing scarce resources to improve health outcomes. It provides a foundation for the understanding of health economics as applied in the wider context of health services research. Public health economics exposes the student to the wider related academic disciplines of importance in understanding the interaction of economics and global health, such as epidemiology, public

health and policy analysis. Research in this stream covers work in the following broad areas: (1) socio-economic inequalities in and determinants of health and health behaviours, (2) social and economic consequences of health and health behaviours, and (3) the economic evaluation of public health interventions. The Conference will feature a highly interactive and multidisciplinary program including initiatives to address the entire medical pathways to the latest fundamental, applied and translational applications in Health Economics and Healthcare Management. To enhance the field and make people aware of it the organizing committee decided to hold a conference. Health Management-2020 is one of the fast growing and developing areas of Public Health. People who have missed attending the past conference are most welcome to present your research ideas at the Health Management-2020 conference. This conference will help you improve networking with eminent people in the field of Health Economics and Healthcare Management.
