### **Summary of Advanced Nursing 2020:**

Advanced Nursing welcomes attendees, presenters, and exhibitors from all over the world. We are delighted to invite you all to attend and register for the World Advanced Nursing Conference. To provide students with the necessary knowledge and skills to contribute towards the development and productivity of their communities.

The organizing committee is gearing up for an exciting and informative conference program including plenary lectures, symposia, workshops on a variety of topics, poster presentations and various programs for participants from all over the world. We invite you to join us at the Advanced Nursing 2020, where you will be sure to have a meaningful experience with scholars from around the world. All members of Advanced Nursing 2020 organizing committee look forward to meeting you in Tokyo, Japan.

### **Importance & Scope of Advanced Nursing:**

Nurses are the largest group of practicing professionals. It is one of the most demanding nursing specialties. A nurse, also referred to as a theatre nurse, specializes in preoperative care which means they provide care to patients before, during and after surgery. Perioperative nurses work closely with Surgeons, Anesthesiologists, nurse Anesthetists, Surgeon's Assistants, Surgical Technologists, and Nurse Practitioners.

This review describes the latest techniques and how they are used to customize the surgery to the needs of the individual patient. Advanced Nurse that can be relevant to general nursing or to specialized areas including mental health nursing, pediatric nursing and post-operative nursing. During a surgical procedure a surgical assistant function in the role of a second physician in the operating room. Nurse education has undergone a process of diversification towards advanced and specialized credentials. Medical nurses can manage five to

seven patients, plus the ones they have admitted and discharged throughout the day.

### **Scope of Nursing 2020: Why to Attend???**

It will provide exposure to the on-going researches in Nursing. It will also provide insight to the novel inventions and techniques. It is very beneficial for the student Nurses and fellowship owners because it provides knowledge in the field. It also gives opportunities to the companies to showcase their products and have face to face meetings with scientists increasing their business opportunities. It also gives companies to know about their market competitors. There may be a whole host of other reasons.

### **Why Japan?**

Requirements of Advanced Nursing in Japan are that candidates have completed twelve years of basic academic study and then three years of basic Advanced Nursing 2020. Public health nurses and midwives require a minimum of one additional year of specialized study. After completing their studies, students must pass the national licensing examination and obtain a license from the Minister of Health, Labour, and Welfare in the case of nurses, or from the prefectural governor, for nurse assistants. Foreign nurses who wish to work in Japan are required to pass the licensing examination and obtain a Japanese nursing license.

To become a registered nurse in Japan, candidates must first obtain a high school degree and then either enroll in a nursing university for four years and earn a Bachelor of Science in Nursing (BSN); attend a junior nursing college for three years, earning an Associate of Science in Nursing (ASN); or study at a nursing training school for three years and obtain a diploma.

Associations and Societies in Japan:

- Japanese Nursing Association
- International Council of Nurses

- Japanese Nursing Association
- International Confederation of Midwives.

### **Market growth of Nursing Research in the last and upcoming ten years:**

The past three decades have witnessed a remarkable growth in nursing development. In both Korea and the United States, nurse scientists are poised to address important issues related to the prevention and management of significant health care problems. The need for greater nursing development in the areas of self-management, genetics, and geriatrics, health promotion across the lifespan, technology, and mental health are briefly highlighted. Future research efforts will be enhanced by interdisciplinary collaboration and the creation of international nursing research centers. At the same time, we need to remain cognizant of the importance of mentoring future Advanced Nursing 2020.

### **Nursing Specialisations**

#### **Asia Pacific:**

Asia Pacific is expected to grow at the fastest CAGR of 6.2% over the forecast period owing to the increasing number of people diagnosed with chronic illnesses. Moreover, international care homes are also investing in countries such as India and Japan. For instance, in October 2013, BAYADA Home Health Care, a home healthcare giant based in the U.S. acquired 26% stake of India Home Health Care (IHHC). In India, 65% of the hospital visits can be managed at home. In May 2016, My Care Line raised USD 526,000 for its alliance with Hoffman World. The Spanish Company provides Hoffman methodology of rehabilitation. In India, Portia is one of the market leaders in the home healthcare industry.

### **Industry Report - Industry SWOT Analysis Chapter**

The Nursing Facilities industry is in the mature stage of its life cycle. Over the 10 years to 2021, industry value added (IVA), which measures the industry's contribution to the US economy, is expected to grow at an average annual rate of 3.4%. This growth rate indicates that the industry will expand faster than GDP, which is projected to increase at an annualized rate of 2.2% over the same period. While demographic trends will continue to promote industry growth, nursing care facilities have been part of American communities since the early 20th century.

### **Industry Analysis & Industry Trends:**

Over the five years to 2021, the industry is expected to continue expanding. Continued aging of the population, which is expected to accelerate over the five-year period, will drive industry growth
