

Editor Note-Volume-11-Physical Mathematics

Dear Readers

I am pleased to mention that during the year 2020, all issues of Journal of Physical Mathematics, volume 11 were published online well within the time and the print issues were also brought out and dispatched within 30 days of publishing the issue online. The objective of JPM is to publish up-to-date, high-quality and original research papers alongside relevant and insightful reviews. Impact factor of JPM for the year 2019-2020 was 0.332.

As such, the journal aspires to be vibrant, engaging and accessible, and at the same time integrative and challenging. Each issue of the journal contains different types of papers, mostly the first, Regional Spotlights; provide a short contemporary and provocative “opinion piece” on an issue in the field of Physical Mathematics. The second, Critical Reviews, provides a critical and concise yet comprehensive and contemporary review of a particular theme specific to the Physical Mathematics. The third type of paper, Research Papers, was more traditional in form and demonstrated a sound theoretical and/or methodological underpinning and a clear contribution to knowledge in the field.

During the calendar year 2020, JPM received around 200 papers, out of which 150 articles (75%) were rejected in the preliminary screening due to plagiarism or being out of the format. During the same year around 50 articles were subjected to the peer-review process and 20 of those were accepted in the 7 issues of Volume 11.

20 articles were published during the year 2020, of which, 70% articles were by foreign authors. A total of 40 research scientists from USA and abroad reviewed the 20 articles published in volume 11. Average publication lag time of an article was further reduced to 3-4 months.

I take this opportunity to acknowledge the contribution of Dr. Francesco Toppan during the final editing of articles published and the support rendered by the editorial assistant, in bringing out issues of JPM in time. I would also like to express my gratitude to all the authors, reviewers, the publisher, the advisory and the editorial board of JPM, the office bearers and staff for their support in bringing out yet another volume of JPM and look forward to their unrelenting support to bring out the Volume 12 of JPM in scheduled time.

Richard Kerner

Professor, Laboratory of Theoretical

Physics Pierre-and-Marie-Curie

University, France April 2020
