

Editorial Note for Healthcare Science

Wang W*

University of Wolverhampton, Research Institute in Healthcare Science, UK

Editorial Note

The Journal of Molecular and Genetic medicine gives you continuous coverage of all genetic and molecular aspects of medicine as well as in-depth documentation of genetic analysis within the current context of genotype/ phenotype correlations. Integrative medicine can help people with persistent pain, cancer, chronic fatigue and many other conditions better manage their symptoms and improve their quality of life by reducing fatigue, pain and anxiety.

Healthcare science staff play a vital role in the prevention, diagnosis and treatment of a huge number of medical conditions. They also help people live independent lives through rehabilitation. There are scientists who use a variety of highly specialised equipment to analyse blood, body tissue, and other bodily fluids. However, many healthcare scientists such as those in the physiological sciences and some in physical sciences and biomechanical engineering will have a lot of direct patient contact and work in clinics or on wards.

Journal of Molecular and Genetic Medicine main aim is to facilitate scientific communication in a clear, concise and objective manner, while striving to provide prompt publication of original works of high standard quality.

All published articles of this journal are included in the indexing and abstracting coverage of Index Copernicus, Google Scholar, Cite Factor,

Sherpa Romeo, Genamics JournalSeek, Academic Keys CiteFactor, Ulrich's Periodicals Directory, Electronic Journals Library RefSeek, Hamdard University, EBSCO A-Z, Directory of Abstract Indexing for Journals, OCLC- WorldCat, Proquest Summons, ROAD, Virtual Library of Biology (vifabio), Publons Studies receiving funding from a funding organization that is included on the list of PMC and Research Funder Policies or authors having NIH grant were submitted to PubMed.

Reasons to publish in Journal of Molecular and Genetic Medicine

1. High quality in-house copyediting to ensure high standards of communication.
2. High visibility with and international readership in relevant fields of research
3. Constructive and efficient peer review.
4. Included in all major bibliographic databases
5. Articles will be freely available.
6. Availability of immediate open access of all articles.

I would also like to congratulate all the authors, reviewers, the publisher, the advisory and the editorial board of Journal of Molecular and Genetic Medicine for their immense support to bring out the Volume 15 Issue 3 grand issue release of Journal of Molecular and Genetic Medicine.
