

Journal of Bioprocessing and Biotechniques commemorates its decade long service to the scientific community by consistently publishing peer-reviewed articles and tracking the progress and significant advancements in the field of biosensors. Ever since its inception in the year 2011, in addition to regular issue releases on a quarterly basis, this transdisciplinary journal is also releasing special issues and conference proceedings from time to time, thus comprehensively covering a wide range of topics and emerging challenges in bio techniques and bio processing. The journal focuses on application oriented research on biological, biochemical, biophysical and electronic principles with biological, biomedical and environmental relevance and utility. In this issue some of the recent and impactful research articles that were published by the journal will be discussed.

I am delighted to introduce the Journal of Bioprocessing and Biotechniques that broadcasts latest insights and advancements on various biochemical and biological processes as well as the associated techniques, while emphasizing on designing concepts, operation and processes for synthesis of biologically derived chemicals, biopharmaceuticals, industrial feed stock, nutraceuticals, bio-plastics and biofuels. I am pleased to announce that, all issues of the 9th Edition were published online well within the time and the print issues were also brought out and dispatched within 30 days of publishing the issue online during the year of 2019.

Journal of Bioprocessing and Biotechniques also announces its new association with Hilaris group for Archiving, Journal maintenance, financial purpose and support. Association with Hilaris group has increased Readership Metrics (By Google Analytics) of the Journal which can be accessed at Google Analytics Metrics. As such, the journal aspires to be vibrant, engaging and accessible, and at the same time integrative and challenging.

A total of 110 research scientists from all over the world reviewed the articles published in volume 9. Average publication lag time of an article was further reduced to 2-3 weeks. Average download per article is increasing and on an average there are 40 downloads per paper. All these are promising signs. We could reach this stage through the constant support of Board Members and intellectual generosity of the readers and contributors (authors and reviewers).

I take this opportunity to acknowledge the contribution of Editor-in-Chief: Henggui Zhang, during the final editing of articles published and the support rendered by the editorial assistants: Stella McGuire in bringing out issues in time. Lastly I would like to express my gratitude to all the authors, reviewers, the publisher, the advisory and the editorial board of the Journal, the office bearers for their support in bringing out yet another volume and look forward to their unrelenting support for the successful release of upcoming editions.

Journal of Bioprocessing and Biotechniques that broadcasts latest insights and advancements on various biochemical and biological processes as well as the associated techniques, while emphasizing on designing concepts, operation and processes for synthesis of biologically derived chemicals, biopharmaceuticals, industrial feed stock, nutraceuticals, bio-plastics and biofuels.

Needless to say, any papers that you wish to submit, either individually or collaboratively, are much appreciated and will make a substantial contribution to the early development and success of the journal. Best wishes and thank you in advance for your contribution to Journal of Bioprocessing & Biotechniques.
