Editorial Note

The Journal of Molecular and Genetic medicine gives you continuous coverage of all genetic and molecular aspects of medicine as well as in-depth documentation of genetic analysis within the current context of genotype/ phenotype correlations. In addition to this, publishes articles related to molecular genetics, molecular medicine, molecular cytogenetics, medical genetics, etc. covering experimental and clinical investigations of the genetic mechanisms underlying genetic syndromes.

The Journal's main purpose is to report original research, review and case reports in the following areas but is not limited to these topics.

Molecular Genetics: Molecular basis of human genetic disease, neurogenetics, developmental genetics, chromosome structure and function, molecular aspects of cancer genetics, biochemical genetics, gene therapy, major advances in gene mapping and understanding of genome organization.

Molecular Medicine: Molecular medicine is a wide field, where physical, biological, chemical, bioinformatics and medical techniques which are used to explain molecular structures and mechanisms, to identify fundamental molecular and genetic errors of disease and to develop molecular interventions to correct them.

Molecular Cytogenetics: Syndromes which are caused due to chromosomal aberrations.

Journal of Molecular and Genetic Medicine main aim is to facilitate scientific communication in a clear, concise and objective manner, while striving to provide prompt publication of original works of high standard quality.

All published articles of this journal are included in the indexing and abstracting coverage of Index Copernicus, Google Scholar, Cite Factor,

Sherpa Romeo, Genamics JournalSeek, Academic Keys CiteFactor, Ulrich's Periodicals Directory, Electronic Journals Library RefSeek, Hamdard University, EBSCO A-Z, Directory of Abstract Indexing for Journals, OCLC- WorldCat, Proquest Summons, ROAD, Virtual Library of Biology (vifabio), Publons Studies receiving funding from a funding organization that is included on the list of PMC and Research Funder Policies or authors having NIH grant were submitted to PubMed.

Reasons to publish in Journal of Molecular and Genetic Medicine

1. High quality in-house copyediting to ensure high standards of communication.
2. High visibility with and international readership in relevant fields of research
3. Constructive and efficient peer review.
4. Included in all major bibliographic databases
5. Articles will be freely available.
6. Availability of immediate open access of all articles.

I am very much happy to inform that, all issues of volume 14 were published online well within the prescribed time and the print issues were also brought out and dispatched within 30 days of publishing the issue online during the year of 2020. I would also like to congratulate all the authors, reviewers, the publisher, the advisory and the editorial board of Journal of Molecular and Genetic Medicine for their immense support to bring out the first Volume 15 Issue 1 grand issue release of Journal of Molecular and Genetic Medicine in January month in this 2021 year.
