Editorial Note

Journal of Clinical & Medical Genomics (ISSN: 2472-128X) is successfully publishing quality of research on all areas related to Genetics and Genetic Engineering. The current volume of the journal is 8 with issue 2. The journal expresses gratitude to all its elite panel of editorial board members for their continuous efforts, support and encouragement throughout the publication journey of the journal, right from its inception in the year 2013 we pride on providing a supportive and accessible service throughout the publishing process and congratulates them for making the journal achieve its goals and becoming successful as one of the leading and well-recognized broadcaster of scientific outcomes in the field of scientific work on Genetics.

The objective of JCMG is to publish high-quality original research papers, survey reports, case studies, narratives, review article, short communication, clinical data, thesis and relevant and insightful reviews. Every year we published with different volumes and different issues. Each issue of the journal covered with different types of topics in the field of Genomics Sequencing, Genetic Engineering, transplantation techniques, Personalized Medical Research, Cancer genomics, Clinical research in genome, Biomarkers in genomic medicine and more. All published papers, are subject to the journal's double-blind review process. The topics for the 2019 year were varied and exciting. The current volume of the journal is 8 with issue 2.

We believe your contribution will enhance the worth of the issue in 2020 in the field of Genetics Research include Genomics Sequencing, Genetic Engineering, Personalized Medical Research, Cancer genomics, Clinical research in genome, Biomarkers in genomic medicine, genomics applications in plants and animals, cloning and more. The submitted papers will be 21 day rapid review process with international peer-review standards. Timeline of processing from Submission to Publication is 45 days. Manuscript will be published within 7days of acceptance.

The social media can play a key role in spreading the research work increased visibility, citation and ultimately the impact of published works. We

promote published articles to the social media. This will benefit the researcher to increase reputation and attendant career progression. For example, the Facebook account, Twitter, LinkedIn and Instagram.

According to the Google Analytics, more than 4000 readers are visiting to our journal websites for submitting manuscripts, to browse the latest research published on genetics and to refer the published content for conceptualizing their research study, deriving research hypotheses, case reports and validating their contributions. Readers from the major countries including United States, Japan, United Kingdom, India, Egypt and Nigeria visit our journal domain to learn about the ongoing research activities in this field.

On behalf of the JCMG Editorial Board and the whole Editorial Office, I would like to express our gratefulness to the authors of articles published during the past years, and to acknowledge generous help which both the authors and editors obtained from the peer-reviewers.

Our aspiration is to facilitate scientific discovery in new ways by exploring new technologies in the field of Genetics.

Regards,

Cathy H. Wu

Editor-in-Chief
