

## Effect of media on psycho-social interaction among the children with their parents of urban people in Dhaka.

**Nazma Sultana**

*American International University*

Social media has become an important part of our daily life. It has a significance influences on the people who use them in their daily life frequently. The number of people using social network sites has been increasing continuously. For this frequent utilization has started to affect our social life. This study examine whether the use of social network sites affects the psychosocial interaction between children and their parents. At first parents introduce their children to the internet and different type of device in their early childhood. Many parents use device for feeding their children by watching rhyme or cartoon. As a result children are habituate with it.

Completed my Masters from Rajshahi university, Bangladesh & Also completed diploma at disaster management and climate change from BRC university, Bangladesh. Very recently I completed my Masters of Public Health at American International University, Bangladesh. I had a short experience to work at research organization.
