

Experts Gathering at 8th World Congress on Antibiotics, Antimicrobials & Antibiotic Resistance

Vahideh Nasr*

Shahid Beheshti University of Medical Sciences, Tehran, Iran

Introduction

The worldwide Antibiotics market is esteemed at \$6,727.29 million in 2014 and is relied upon to develop at a CAGR of 13.03% in the vicinity of 2014 and 2019. Expanding sickness weight of irresistible maladies and expanded subsidizing for social insurance consumption are the essential development drivers for this market amid the conjecture time frame. The pharmaceuticals application fragment represented the biggest share of the Antimicrobials advertise in 2014; while the nourishment application portion is normal develop at the most astounding CAGR in the vicinity of 2014 and 2019 in the worldwide Antibiotics showcase.

Emerging regions such as Asia-Pacific (including Japan, China, and India) are expected to become the new revenue-generating pockets in the market in the next five years. The Asia-Pacific market is projected to grow at the highest CAGR during the forecast period owing to the growing number of hospitals and clinical diagnostic laboratories in India and China; expanding research capabilities for the development of innovative and affordable clinical Antibiotics testing procedures across India, China and Japan and rising incidences of infectious diseases.

Antimicrobials size was valued at over USD 24.3 billion in 2017 and will exceed USD 675.2 billion with 7.9% CAGR from 2017 to 2024. At Global Market Insights, It is a unique blend of primary and secondary research, with validation and iterations, in order to minimize deviation and present the most accurate analysis of the industry. Rising demand of new technologies will drive the biotechnology industry size. we've seen tremendous growth and change in the industrial diagnostics industry, particularly in the food safety sector expertise in all aspects of the market, plus extensive experience in business management, strategy development and international business, Antibiotics test volumes, market values and methods used by food producers around the world, based on detailed interviews with more than 450 food production facilities in America, Europe and Asia, including Japan.

The global DNA sequencing market is projected to reach USD 85.5 Million by 2025 from USD 310.1 Million in 2017 growing at a CAGR of 8.5% during the forecast period.

The global market for food antibiotics reached nearly \$7.1 billion in 2017. This market is expected to grow to nearly \$9.6 billion in 2017 and \$15.7 billion by 2025, with a Compound Annual Growth Rate (CAGR) of 8.1% from 2017 to 2025.

Global nanotechnology market was valued at \$216.2 billion in 2017 and \$448.3 billion in 2017. The total market is projected to grow at a Compound Annual Growth Rate (CAGR) of 19.3% from 2017 through 2025 and reach \$828 billion by 2025.

Importance & Scope

Antimicrobials 2020 is a conference designed in a way to provide an exclusive platform for upcoming researchers, scientists, students and educators to present and discuss the latest innovations, trends, and concerns, practical challenges encountered and the solutions adopted in the microbiology field. The two days of educational program will be composed of keynote talks, session speakers, and poster presenters on the latest in innovative technologies as well as papers in the areas of Antimicrobials conferences, Antibiotic events, Antibiotic Resistance conferences, workshops on the field of microbiology.

Target Audience

- Food Safety Experts
- Alliances of antibiotics
- Business Entrepreneurs
- Antibiotics Researchers
- Strategic Drug Development
- Executive Council of Global
- Directors of Pharma Industries
- Medical Affairs and Networking
- Public Health Preparedness Sectors
- Scientific Business Communications
