

## Gastro Congress 2020 Market Analysis

Annie Shergill

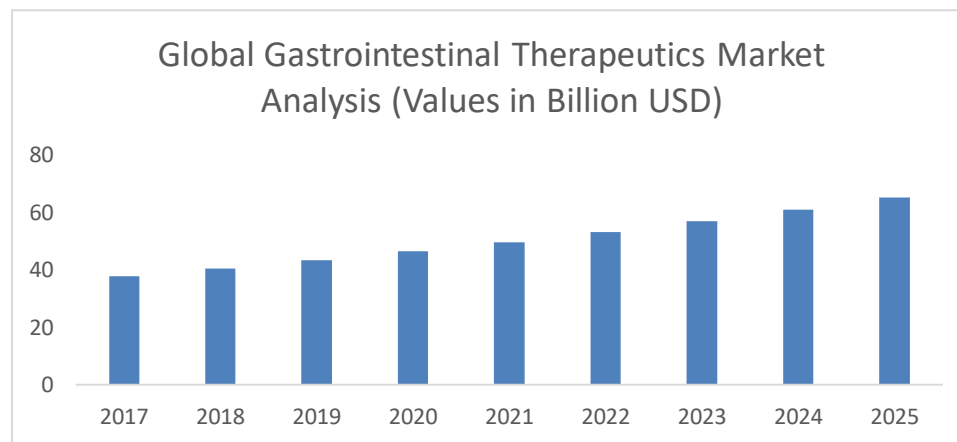

University Medical Center, USA; Email: [ashergill@email.arizona.edu](mailto:ashergill@email.arizona.edu)

Gastroenterology is the branch of medicine Related to the GI tract (stomach and intestines) and the accessory organs of digestion (from the mouth to the anus) focused on the digestive system and its disorders. Some of the conditions treated under this specialty include but are not limited to Crohn's disease, Gastroesophageal reflux disease (GERD), inflammatory bowel disease, irritable bowel syndrome, peptic ulcer disease, celiac disease, colon cancer, heartburn, gastric cancer, diverticulitis, and ulcerative colitis.

Gastrointestinal diseases refer to diseases involving the gastrointestinal tract, namely the esophagus, stomach, small intestine, large intestine and rectum, and the accessory organs of digestion, the liver, gallbladder, and pancreas.

For more details, please visit: <https://europegastroenterology.gastroconferences.com/>

The global gastrointestinal therapeutics market size is expected to reach USD 65.1 billion by 2025, according to a new report by Grand View Research, Inc., registering a 6.6% CAGR during the forecast period. Growing geriatric population prone to gastrointestinal indications is one of the key factors anticipated to contribute to market growth. According to a report by WHO, colon cancer caused nearly 694,000 deaths in 2014.

**Fig: Gastroenterology market size,2017-2025 65.1 (USD billion) by 2025**

A wide range of new generation therapeutics targets that include novel small molecules and cellular therapy are currently under investigation. These include tofacitinib, ustekinumab, mongsersen, and vedolizumab. This influx is anticipated to be a consequence of high prevalence of gastrointestinal diseases globally. Vedolizumab is emerging as a first-line biologic therapy for

---

Crohn's disease. Currently, the U.S. FDA has approved Humira, Amjevita, Cimzia, Remicade, Renflexis, Inflectra, Tysabri, and Entyvio for the treatment of Crohn's disease.

Some studies have indicated that biologics exhibit greater long-term efficiency. According to a study conducted by University of Chicago, usage of biologics has resulted in an overall decrease in the number of surgeries by approximately 40.0%, emergency room visits by 60.0%, and hospitalizations by 50.0%.

Similarly, the National Institute carried out a study on effectiveness of infliximab in treatment for Health Research and it was reported to be a cost-effective solution in episodic treatment of active Crohn's Disease. Increasing need for cost containment in drug development as well as administration costs is likely to fuel growth opportunities for biologics. Advent of targeted treatment alternatives has led to development of more personalized biologics.

### **Importance & Scope:**

Gastro Congress 2020 provides a great platform by gathering eminent professors, Researchers, Students and delegates to exchange new ideas. The conference will cover a wide range of topics and allow participants to discuss about the management of Gastrointestinal, liver, pancreatic diseases. Gastro Congress 2020 conference consists of keynote and plenary lectures, special sessions (Workshop and Symposium), Young Researcher Forum and Poster presentations. Best poster presenters will be judged and awarded during the conference. To encourage broad participation from all over the world Conference Series Ltd is offering reduced registration fee for students.

### **Relevant Societies:**

USA: American Gastroenterological Association, Canadian Association of Gastroenterology, North Carolina Society of Gastroenterology, Canadian Society of Gastroenterology Nurses and Associates, Florida Gastroenterological Society, Ontario Association of Gastroenterology, Alabama Gastroenterological Society, Comparative Gastroenterology Society, American Neuro-gastroenterology and Motility Society.

Europe: British Society of Gastroenterology, European Society of Gastroenterology and Endoscopy Nurses and Associates, European Society of Gastrointestinal Endoscopy, European Society for Paediatric Gastroenterology, Hepatology and Nutrition, Scottish Society of Gastroenterology, British Society of Pediatric Gastroenterology, Hepatology and Nutrition, European Society of Coloproctology, European Helicobacter and Microbiota Study Group, European Society of Neuro-gastroenterology and Motility, European Society for Diseases of the

## Target Audience:

- Gastroenterologists
- Hepatologists
- Surgeons
- Internal Medicine Physicians
- Oncologists
- Scientists
- Researchers and Scholars
- Physician's Assistant and Nurses
- Academicians

- 
- Delegate
  - Business entrepreneurs
  - Pharmaceutical companies
  - Companies manufacturing medical devices
  - Healthcare Institutions
  - Research and Medical Laboratories
  - Related Companies/Industries:
  - Allergan Pharmaceuticals
  - Boston Scientific
  - Cogentix Medical
  - EndoChoice
  - EndoGastric Solutions
  - Evoke Pharma
  - Exact Sciences Corp. (colorectal cancer)
  - Fujifilm Medical Systems USA
  - gMed, a Modernizing Medicine Co.
  - Interscope
  - Johnson & Johnson
  - Motus GI
  - Olympus Corp. of the Americas
  - Pentax Medical USA
  - Physicians Endoscopy
  - Synergy Pharmaceuticals
  - Salix Pharmaceuticals
  - Shaili Endoscopy
  - Takeda Pharmaceuticals USA
  - US Endoscopy Group
  - Related Associations and Societies:
  - International Liver Transplantation Society
  - Japanese Society of Gastroenterology
  - Latin American Association for the Study of the Liver
  - Liver Kids Australia
  - National Pancreatic Cancer Foundation
  - North American Society for Pediatric Gastroenterology, Hepatology and Nutrition
  - Princeton Gastroenterology Associates
  - Rappahannock Gastroenterology Associates
  - Saudi Gastroenterology Association
  - Society of American Gastrointestinal and Endoscopic Surgeons
  - British Liver Trust
  - British Society of Gastroenterology
-
