Market Outlook for Stress Management 2020:

Stress Management 2020 focuses on broad array of disorders and cure of brain and connecting neurons. According to the latest survey conducted by WHO, it is revealed that Psychological Disorders encompassing Stroke, Alzheimer & Dementia, Epilepsy and many more accounts for more than 12% of deaths worldwide on an average and it is also predicted that the number of disability-adjusted life years vanished due to Neurological disorders are expected to accelerate from 95 million globally in 2015 to 103 million by 2030. Moreover, the worldwide cost of neurological sequel solitary estimated in 2010 was US\$ 2.5 trillion and it is assumed that the value will spike to over US\$ 6 trillion by 2030.

Psychiatrics today holds a position in the various medical centres of the world which varies from complete nonexistence to high and complex development. Invasion of the field of neurology by different types of clinicians, the rapid development of psychiatry, the late appearance of neurosurgery and the important recent advances in neurophysiology and neuro-anatomy, all help to account for this variability and demand a reconsideration of the scope of neurology. A survey of neurology, neurosurgery and neuropathology as they are to be found in various centres of learning today supports this view. From the time that neurology first emerged as a specialty, it has suffered a progressive reduction in scope.

America dominates the market is mainly because of the rising incidence rate of Anxiety Disorders, Stress & Depression Treatment in a particular region. Other mentionable reasons for

The global Psychology technology Market is expected to reach USD 100 million by 2023 growing at a 12% CAGR over the forecast period 2017-2023.
