

# Hidden Myths of Neurology to be Explored

**Shanmugam Rajendran\***

*Department of Internal Medicine and Diabetology, Dr. MGR Medical University, Chennai, India*

Journal of Neurological Disorders (JND) is an International journal which provides and throws light on all types of Neurological sciences like Neuro physiology, Electro physiology, research on peripheral nerves and brain, various functional, physiological aspect of brain related to neuro chemistry and lot of clinical cases.

Journal of Neurological disorders provides lot of opportunities for young neurologists to submit their hard work. We are utilizing tracking type platform where tutors and reviewers can see their program of their article. We want our scientists / researchers / healthcare organizations to explore the brain, especially memory and intelligence even where lot to be throw... to all practicing neurologists.

Still lot of mysteries of the brain yet to be solved especially with dream, emotions, how is information collected and how to decode memory storage, emotion etc.

Still more wonders are there in the pineal gland called THIRD EYE seat of Soul play, a major role over brain function especially in a cyclic rhythm like menstrual cycle etc., Neuro chemistry and melatonin role to be looked out.

Meditation, Pranayama, Yoga and their relation to brain activity to be arisen in relation to neurology to avoid catastrophic feature in brain.

About 80% of the world commoners stay in growing nations in which the worst fitness signs are discovered. Their chief health problems are normally related to warm thundershower, overcrowding, baroque poverty, ignorance and baroque babe mortality which rebound in a burden of infection from catching affections that differs appreciably from the rest of the arena. Brought to those issues, the fitness budgets are low and breaks for network interventions are really small. A demographic transition is underway throughout the world as populations age, the burden of non-communicable affections (cardiovascular affections, stroke and cancer) increases, generally within the least favoured regions. Therefore, the general public of least developed foreign emplacements are facing a double burden from catching and non-communicable affections. The worldwide public health community is now faced with a excess complicated and chromatic sample of person affection than formerly augured and proposes a "double answer" that integrates averting and manipulate of both catching and non-communicable affections within a complete healthcare device. A countable affections that was begin within the advanced world notwithstanding have truly dematerialized, according of poliomyelitis, leprosy and neurosyphilis, are notwithstanding taking their expense in growing areas. Further, a

number of the protozoan and helminthic infections that are so affection of the tropics are now being visible with growing commonness in evolved foreign emplacements due to migration, big-scale military enterprises and fast approach of shipping which have the undesirable eventuality to introduce sickness vectors. Yea though some contagious conditions have been nearly wiped out, the giant adulthood of them will no longer be counted in the foreseeable fate. Indeed, WHO reviews that at the least 30 new conditions were scientifically diagnosed around the world in the final twenty eras? Those arising conditions encompass Hantavirus, cryptosporidiosis (a waterborne motive of diarrhoea that these days affected exceptional than 400 000 mortal beings in a unattached outbreak inside the united countries), the Ebola fungicide from Africa and the mortal hallowed inadequateness fungicide (HIV), among others. Re-rising conditions are the infections once notion beneath manage and emerge conditions along with tuberculosis, malaria, cholera or yea diphtheria are coming round again.

With all we would look forward to expand and welcome a wide range of research people to utilize this Journal of Neurological disorders as a step in plat form by sharing your experience so as to raise quality improvement and improve our relationship to a large extent your work truly enhance the reputation of the journal.

Finally I want to offer the gratitude to all the creators and analytical people and happy to welcome the commenting the Physicians, I extend my kind request to grand support to all. Only team work to raise the impact factor of the Journal and useful humanity.
