Short Communication

With respect and affection, in order to show a project that should already be aware, since June 5, 2015, email me, just as I sent via Twitter what was then the project.

Holiness, I humbly believe I know his great concern about climate change; I, and therefore instead of letting it pass; while I have started to work, and we have done a project that unfortunately cannot solve the problem globally, but if you save, with help from others, the Mediterranean, the imminent rise in sea level, and banks where more than half a billion people, or 15,000 islands in the Mediterranean and its more than one hundred thousand live Km. of coastline.

This is a dream come true, (unite Europe and Africa) through the Straits of Gibraltar and in turn regulate the level of the waters of the Mediterranean, without stopping at any time the passage of all types of vessels and fauna and marine flora, as I explain with drawings and video that brought about it.

This does not have to protect the cities individually and depending on how rich they are, as I believe and selfishly has made Venice; because what has cost the dam bassinet (MOSE) € 7,500,000,000.00 to protect one city, though very rich, would have protected the whole coast 24 countries in the Mediterranean.

Holiness, liking the project that we are delivering, I selflessly offer to collaborate with the Minister of Environment everything necessary to achieve the common goal of protecting the environment.

Holiness, this project is also aware, President Obama, King Felipe VI, the governments of Spain and Morocco and the European Union.

This work not cost one Euro, or Spain or Morocco, the only countries that take part in this project, because it would be built by the concession system and its cost will be covered by tolls.

Holiness, receive a greeting nuns of Lucena, which I visited.

I remain at your disposal, with my thanks, waiting for his blessing.

Madrid, September 7, 2015.

Juan Valle Anguita

President Presa Gibraltar Strait Bridge, S.A.
