

## International Conference on Immunology & Immunotherapies April 27, 2021

**Dr. Le Minh Sat**

Deputy Director, Department of Science and Technology, Vietnam, E-mail: [ImSAT@most.gov.vn](mailto:ImSAT@most.gov.vn)

Warm Welcome to all as we affably invite you to be a part of the **International Conference on Immunology & Immunotherapies April 27, 2021 (Webinar)**.

We invite all the participants from all across the globe to attend "[Immunology & Immunotherapy](#)" conference during April 27-2021 Webinar which includes prompt keynote presentations, poster and oral talks. This conference plays a Global platform for biomedical companies, clinical research divisions, professionals, specialists, consultants, doctors, scholars and students to frame a new relationship and build up the Knowledge. This is a wonderful opportunity for all the delegates to interact with the top grade world class Scientists. The particular members can confirm their participation through [Registrations](#).

**Theme:** *Innovative therapies for a better immune system*

### Target audience:

- Immunology students
- Directors
- CEO
- President
- Research scientists
- Organizations
- Vice-president
- Eminent personalities
- Post-docs
- Associations heads and Professors
- Immunology laboratory heads
- Students
- Clinical Immunology Researchers and the other affiliates related to the area of Immunology and immunotherapy.

We are expecting around 50+ Speaker and 100+ delegate participants excluding the students for our Conference. The gathering of international experts and investigators in Japan will lead the conference discussion to the extent of exploring the new happenings, investigating the case studies, and innovating the truth behind the Vaccines and Immune Diseases.

Enroll now to be present the sessions on Vaccines, Types of Vaccines, Pediatric Vaccines, HIV Vaccines, Veterinary Vaccines, Toxoid Vaccines, Tuberculosis Vaccines, Animal and Plant derived Vaccines, DNA and Synthetic Vaccines, Combination and Conjugate Vaccines, Cancer Malaria & Tuberculosis Vaccines, Bacterial Vaccines, Childhood and Maternal Vaccines, Zika Virus Vaccines, Giving Vaccination, Vaccines Production and Development, Immune Diseases, Immunoresearch and Immunotechnology, Immunology and Disease, Autoimmune & Inflammatory Diseases.

The program includes plenary talks and keynote speeches from internationally renowned scientists. Each of these speakers helped to shape the modern concepts of the Field of Immunology. Besides, there will be sessions for oral and poster presentations. Presentations in these sessions will provide an overview of the cutting-edge technologies being used to address difficult therapeutic and the theoretical issues in the Field of Immunology.

[Immunology](#) is unique in its approach of encouraging a dialogue between the basic and clinical scientists. We expect to have these dialogues both during the scientific sessions and networking time. We hope to make it submit particularly educational and inspiring for young scientists who will get an opportunity to interact with leading experts.
