### Journal

Journal of Infectious Diseases and Medicine is an international peer reviewed journal for those researching, teaching or practicing in the fields of quality improvement, clinical governance or clinical audit related to primary and prehospital care. The journal is concerned with all aspects of quality and quality improvement in primary and prehospital care and the interfaces between primary, secondary and social care. We publish high-quality original research that advances knowledge on these topics generalizable to other settings and countries and from other disciplines related to medicine, including nursing, practice management, professions allied to medicine and social science.
