Letter to Editor

Dear editor, beautiful has been the topic of interest for a long time. Everyone like a beauty appearance and the cosmetology is the specific science for promotion of beauty. The medical cosmetology is widely practice at present. Many new advance cosmetic materials and techniques are available. Most of them are artificial and synthesized. Based on the concept of green technology and think earth at present, returning to the nature is the new concept [1]. Of several fields of medicine in the present day, natural medicine is the specific medicine with the closest relationship to nature. It is interesting that the use of natural medicine in medical cosmetology should be promoted. In fact, there are several local wisdoms regarding the beauty promotion and this should be further studied and researched in medical cosmetology. Several herbal medicine systems have been reintroduced for a few years [2]. As the local wisdom pass a long period of time, the safety and efficacy might be expected. However, there are several obstacles on using local natural medicine wisdom and medical cosmetology. Those problems include,

Lack of modern proofs on local wisdom cosmetic regimens

Slow and lack of modern quality control in preparation of classical natural product

Lack of legal control on manufacturer and distribution.

How to promote and redecorate the wisdom to reach the present fashion and modern trend is the topic for further research and development.
