

Market Analysis for Parkinson's Congress 2020

Kyung Hee Do

Veterans Health Service Medical Center, Republic of Korea, E-mail: khdo79@gmail.com

Parkinson's disease (PD) is a long-term degenerative disorder of the central nervous system that mainly affects the motor system. The symptoms generally come on slowly over time. Early in the disease, the most obvious are shaking, rigidity, slowness of movement, and difficulty with walking. Thinking and behavioral problems may also occur. Dementia becomes common in the advanced stages of the disease. Depression and anxiety are also common, occurring in more than a third of people with PD. Other symptoms include sensory, sleep, and emotional problems. The main motor symptoms are collectively called "parkinsonism", or a "parkinsonian syndrome".

The report provides separate comprehensive analytics for the US, Canada, Japan, Europe, Asia-Pacific, Latin America and Rest of World. Market data and analytics are derived from primary and secondary research.

The [Global Parkinson's Disease](#) report published by the Ameco Research provides a detailed analysis of Parkinson's disease market along with the current trends and future outlook. The report covers the quantitative and qualitative data and the factors that are responsible to drive and restrain the growth of the target market. The report provides the overview of the segments and information of the key manufacturers operating in target market. The report provides the detailed overview of the industry value chain process along with the regulatory scenario for various products and services across the globe. The report includes cost structure analysis providing the overview of manufacturing expanses and labor cost required for the product.

The global Parkinson's Disease market is valued at 4240 million US\$ in 2018 is expected to reach 6810 million US\$ by the end of 2025, growing at a CAGR of 6.1% during 2019-2025.

This report focuses on Parkinson's Disease volume and value at global level, regional level and company level. From a global perspective, this report represents overall Parkinson's Disease market size by analyzing historical data and future prospect. Regionally, this report focuses on several key regions: North America, Europe, China and Japan.

At company level, this report focuses on the production capacity, ex-factory price, revenue and market share for each manufacturer covered in this report.

Parkinson's Disease total prevalent population in the 7MM countries was observed to be 1,608,367 in 2019 and is growing at a CAGR of 0.54% for the study period [2019-2028]

Parkinson's Disease market size was USD 1837.90 million in 2019 in the 7MM. Among the 7 Major Markets, the United States accounted for the majority of the market size, with USD 941.13 million followed by Germany, which has the second-highest market size after the United States in 2019.

	USA	Germany	Italy	Spain	UK	France	Poland	India	Japan
PD cases recorded world wild 2019	60000	260000	200000	150000	120000	117000	140000	1,00,000	208500

As per WHO statistics worldwide PD case are recorded 2019 year are following.

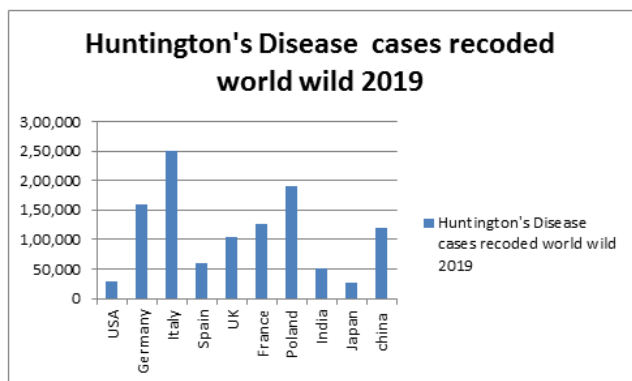

It was observed PD cases are been increased very year worldwide research on Parkinson's and Huntington disease are focused heavily.

	USA	Germany	Italy	Spain	UK	France	Poland	India	Japan
Huntington's Disease cases recoded world wild 2019	30000	160000	250000	60000	105000	127000	190000	50000	26000

Huntington's disease is an inherited condition in which nerve cells in the brain break down over time. It is a progressive brain disorder that causes uncontrolled movements, emotional

problems, and loss of thinking ability (cognition). Adult-onset Huntington disease, the most common form of this disorder, usually appears in a person's thirties or forties.

Importance & Scope: Parkinson’s congress focuses on the rate of uptake of the potential drugs recently launched in the market or will get launched in the market during the study period from 2019-2028. The analysis covers market uptake by drugs patient uptake by therapies and sales of each drug.

This helps in understating the drugs with the most rapid uptake reasons behind the maximal use of new drugs and allows the comparison of drugs on the basis of market share and size which again will be useful in investigating factors important in market uptake and in making financial and regulatory decisions.

Target Audience: Parkinson’s congress target Neurologists, researchers, Therapists, counselors, Rehabilitation therapists, Psychologists, physiotherapists as speakers we also invite exhibitors to exhibit the products and services from commercial and non-commercial organizations like Drug manufactures, Clinical Trial Sites, Management Consultants, Chemists, Pharmacists, Business delegates and Equipment Manufacturers.
