

Market Analysis@ Lungs 2020

Prof. Jing Liu

Director, Beijing Chaoyang District Maternal and Child Health Care Hospital, China, Email: liujingbj@live.cn

Conference Series Ltd is overwhelmed to announce the commencement of 5th International Conference and Exhibition on Lung & Respiratory Care to be held during August 17-18, 2020 in Paris, France. The upcoming conference will be organized around the theme "Revolutions in Lungs & Respiratory Diseases".

Scientific Session: Lung Injury and Repair, Pediatric lung diseases, Lung Transplantation, Tuberculosis, Pulmonary diseases-treatment and therapies, Pathophysiology of COPD, Respiratory Pharmacology & Care, Lung Disease and Respiratory Health.

Dubai is a city that is a fusion of cultures, traditions, beliefs and celebrations of enormous number of people coming from different parts of the world, all living under one roof, in peace and harmony. Dubai is a melting pot where Middle East meets the rest of the world which can also be a great experience for the participants.

Introduction

Increasing prevalence of metastasis diseases due to the growing of advanced years population and increasing pathogens within the atmosphere has been the key issue driving the Chronic hindering pulmonic malady market globally. Pharmaceutical firms are developing new bio-based medications together with bio-technology that guarantees large growth opportunities alongside property development for [Lungs Disease](#) market over consecutive decade.

The world-wide Respiratory disease drug market may be a multi-billion dollar market that contains a history of many decades and has witnessed range of technological advancements and products development over the past few years. Approaching treatment methodologies like once-a-day combination

merchandise and organism antibodies have created new opportunities for the market growth.

Why to Organize Lungs & Respiratory Disease Conference

[Lungs 2020](#) Conference will enlighten the participants by providing the latest clinical updates, recent advancements inside stage of pulmonology & lungs care. This metastasis Congress will facilitate the physicians and practitioners globally to share their experience and to adopt the best practices, to strengthen the clinical cooperative analysis and to network among each other. Eminent Speakers around the world will discuss on novel technologies and trendy updates inside the internal organ and metastasis systems the distinct attribution of this metastasis Conference. Dedicates sessions on Pulmonology, Lungs care, COPD, respiratory disorder will any facilitate the participants to increase their information.

Scope and Importance

[Pulmonary health](#) includes an explicit interest on the impact changes in metastasis care and therefore the awareness is increasing once a year, and thus Lungs 2020 encourages submissions from researchers based mostly in USA, Europe and Asian countries.

The challenge of the sector is to gauge current promising interventions strictly, address rising problems like synthesizing ever-increasing analysis findings, and develop innovative dissemination and communication methods.

Lungs 2020 provides a platform that helps authors to share their data with a wider audience, and sustains a fast method for submissions leading to prime quality

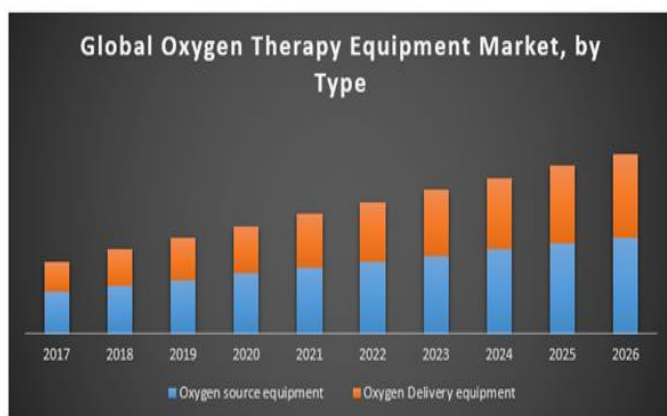

publications. We tend to additionally aim to contribute towards reducing the inequity in publications from low- and middle-income countries. Our audience is international and that we shall share analysis ends up in Respiratory Disease from all components of the globe.

Business Value of Respiratory Disease & Care Sector

Growing prevalence of respiratory diseases due to the increasing population and pathogens in the environment has been the key aspect for motivating the respiratory disease market globally. Pharmaceutical companies have been developing new bio-based drugs in amalgamation with bio-technology which promises massive growth opportunities along with sustainable development for respiratory disease market over the next decade. Every year the usage of Respiratory devices is on high rise and the market is growing exponentially to meet the demand.

Oxygen Therapy Market Size to Reach USD 18.2 Billion By 2024. The global respiratory inhaler devices market value is expected to increase to US\$ 43,214.0Mn by 2025.

The Global Universities

USA

- University Of Miami
- University of Georgia
- Harvard University
- Washington University
- University of Illinois
- Augusta University
- Wayne State University
- Penn University
- University of Maryland
- Drexel University
- University of Charleston
- West Virginia University
- University of Minnesota

Europe

- University of Birmingham, United Kingdom
- University of Strasbourg
- Versailles Saint-Quentin-en-Yvelines University
- University of Nottingham
- Imperial College London, United Kingdom
- Albert Ludwig University of Freiburg
- Ruprecht Karl University of Heidelberg
- Eberhard Karl University of Tubingen
- University of Birmingham, United Kingdom
- University of Strasbourg
- Versailles Saint-Quentin-en-Yvelines University
- Medical University of Vienna
- Belarusian State Medical University
- Gomel State Medical University
- Medical University of Innsbruck

UAE

- Al Hosn University, UAE
- Khalifa University of Science, Technology & Research, UAE
- New York University, UAE
- Paris Sorbonne University, UAE

- University Mohammed V-Agdal, UAE
- Zayed University, UAE
- Al Ghurair University, UAE
- British University, UAE
- Abu Dhabi University, UAE

Asia Pacific

- National University Hospital, South Korea
- Institute Of Respiratory Medicine, Malaysia
- Temple University, Japan
- National University Of, Singapore
- Khon Kaen University, Thailand
- Topiwala National Medical College, India
- B. Y. L. Nair Charitable Hospital, India
- Sms Medical College Hospital, India
- Acute Respiratory Diseases in Students at the University, Philippines

Middle East

- Weill Cornell Medical College in Qatar
- Paris-Sorbonne University Abu Dhabi
- Mohammed bin Rashid University of Medicine and Health Sciences
- Hebrew University
- Alexandria University
- Cairo University
- Gulf Medical University
- Sana'a University
- American University of Kuwait
- The Lebanese American University (LAU)
- King Saud bin Abdulaziz University for Health Sciences
- King Saud University

Respiratory & Lungs Related Association & Societies

USA

- National Medical Association
- Respiratory Medicine Association
- Alpha-1 Foundation, United States
- American Association for Respiratory Care

- Association for Professionals in Infection Control and Epidemiology
- Infectious Diseases Society of America
- Australasian Society for respiratory Medicine
- International Association of Physicians in Respiratory care
- American College of Chest Physicians
- American College of Emergency Physicians
- American College of Physicians
- American Lung Association, USA
- American Academy of HIV Medicine
- American Sexual Health Association

Europe

- European Association for Bronchology and Interventional Pulmonology
- Cystic Fibrosis Europe
- British Lung Foundation
- British Thoracic Society
- European Respiratory Society
- European Federation of Allergy and Airways Diseases Patient Associations
- European Idiopathic Pulmonary Fibrosis & Related Disorders Federation
- European Pulmonary Hypertension Association
- Association for Respiratory Technology and Physiology
- The Primary Care Respiratory Society UK
- European COPD Coalition
- European Lung Foundation

Asia Pacific

- COPD Club of Northern Thailand
- Chinese COPD Patient Education Organization
- Asian Pacific Society of Respirology
- COPD Patient Organization of Vietnam
- COPD Patients Club Kyrgyzstan
- Chinese Thoracic Society

Middle East

- COPD Research Centre of Iran

- Pozitif Assam Derneği (Positive Living Association)
- Egyptian Respiriology Society
- Wooridul Spine association, South Korea

Lists of Respiratory & Lungs Disease Hospitals in Worldwide

- Singapore General Hospital
- Toronto General Hospital, Canada
- University of Tokyo Hospital, Japan
- The Mayo Clinic, USA
- Johns Hopkins Hospital, United States
- Cleveland Clinic, United States
- University of Missouri Health System: University Hospital, Columbia
- Chinese COPD Patient Education Organization, China
- COPD Patients Club, Kyrgyzstan
- Upper River Valley Hospital, Canada
- Wooridul Spine Hospital, South Korea
- Vale Hospital, UK
- Ramkhamhaeng Hospital, Thailand

Conclusion

This conference can provide principles to a different strategy for acquainting recent data on metabolism with members with the target that the arrangement of the results will provide a groundwork workplace yield and additionally a vital instrument to be shared among patients and clinicians. Associate in nursing authoritative purpose is to manufacture determined appreciation and organization of their unwellness, which might provoke higher prosperity and better life wish for the patients and moreover diminished value managing the ill. At the conclusion of the gathering, members need to have the capability to all or any the additional seemingly comprehend the metabolism and clinical elements of the main neurotic maladies and problems, with Associate in Nursing accentuation on clinical-respiratory co-relations and a part of an avid diagnostic test.
