**International Conference on Artificial Intelligence, Robotics & IOT** (Robotics & AI 2020) is going to become a huge platform to all the IT professionals, mechanical engineer, scientist, researchers and innovators and expertise in the field of AI, Robotics and IOT to share and explore their views on their research and case studies with the global experts. The conference is going to be held during May 11-12, 2020 London, UK which revolves around the theme "Analytical Innovations-Opportunities in Artificial Intelligence, Robotics and IOT."

Conference Series is delighted to welcome you to London to take part and share in the International Conference on **AI and Robotics 2020** to be held from May 11-12 in London, UK.

You will experience the vibrant city of UK, drenched with culture, history and more. The conference promises several and thought-provoking program, a global meet for the seminar and discussion of the cutting-edge research which is related to the AI and Robotics. It is an event to make network, to listen, to discuss, to share knowledge and to bring together inspired **AI and Robotics** researchers and scientists.

We welcome all researchers and will facilitate interactions with prominent senior investigators in the field of Automation as well as the scientists from leading AI based companies. We hope the conference will provide a forum to exchange scientific ideas, encourage new research, and new contacts for closer partnership, so that we can together define the future for the young researchers who are today's reality and tomorrow's future.

We are thrilled to bring together a community of individuals dedicated to transforming the health in a different way. Artificial Intelligence, Robotics & IOT (ROBOTICS & AI 2020) is more than a conference, which has something for everyone from the science in the field of AI. As a community of natural healer's, we know that we need to mobilize and be the change we want to see in the medical era. It is our opportunity to connect with the people involved in this from all over the world to learn the latest information on the Automation. This International Conference will provide a platform to budding researchers share their thoughts and experience towards the betterment of the quality of life.

Let us gather and share our knowledge and experiences in the Artificial Intelligence, Robotics & IOT for the betterment of the quality of life of our fellow humans.

Robotics & AI 2020 greets every attendee, presenters and exhibitors from all over the world to join the conference to be held on **May 15-16, 2020 in London, UK**. The organizing committee of "Robotics & AI 2020" is organizing an exciting and informative conference program including informative lectures, symposia, workshops on different topics, poster presentations and various programs for participants from all over the world. We are delighted to invite all the attendees, researchers, students, entrepreneurs, Presenters, Sponsors and Exhibitors to register and attend the conference **Robotics & AI 2020**. The theme of the conference is "Analytical innovations-opportunities in Robotics and Artificial Intelligence". Thus, attend the conference and create a platform to share information,

recent technologies and searching the bright scope in the field of Robotics and Artificial Intelligence.

The market of Robotics, Artificial intelligence and IOT expected have a significant growth with the rising adoption of industrial automation. Robotics and Artificial Intelligence have shown most of the growth in almost every field like manufacturing, software, telecom, researching, and logistics which requires precise workflow operation.

Robotics and Artificial intelligence includes many engineering domains in one field like computer science engineering, electronics engineering, mechanical engineering, and other engineering domain. With the help of AI now the robot can express their emotions. Thanks to Robotics and Artificial intelligence now we have smart home technology, smart voice assistant, self-driving cars and many more. Also, thanks to all researchers and engineers to make this field very important in the market. Robotics is now widely used in military, security, construction, and field of medical, agriculture, household operation, and education.

The robotics market is divided under North America, Europe, and Asia Pacific and the rest of the world. Europe precedes the robotics market at the highest usage of industrial robots. The Asia Pacific exhibits the fastest growth in the robotics market, majorly due to the presence of emerging countries like China, Japan, South Korea, and Taiwan.

According to resource the robotics market was valued at USD 31.78 billion in 2018 and is expected to register a CAGR of 25% over the forecast period of 2019-2024. In the field of AI, Gartner predicts the business value created by AI will reach \$3.9T in 2022 and IDC predicts worldwide spending on cognitive and Artificial Intelligence systems will reach \$77.6 B in 2022.

### Target Audience

- Students

- Business Entrepreneurs
- Industry professionals
- Directors/Managers/CEO's
- Presidents & Vice Presidents
- Research faculty
- Providers of Robotics and AI Services
- Brand Manufacturers/ Marketers of Consumer Products
- Marketing, Advertising and Promotion Agency Executives

### Artificial Intelligence Growth Potential Graph:
