

2020 Conference Announcement

Open Access

Microfluidics Conference 2020 Scheduled on September 14-15, 2020 | Dubai, UAE

Xian-En Zhang

Principal Investigator and distinguished professor Beijing China, E-mail: zhangxe@ibp.ac.cn

Microfluidics Conference

Microfluidic technology offers a growing set of tools for manipulating small volumes of fluids to control chemical, biological, and physical processes that are relevant to sensing. The development of these tools based on lithographic techniques enables integration with electronic and optical elements necessary for the construction of operational sensor.

<u>Dubai Microfluidics 2020</u> is an event that aims to explore the ways to innovate in the field of Engineering and Microfluidic. The conference aims to bring together leading academic scientists, researchers and research scholars to exchange and share their experiences and research results on all aspects of Microfluidics and its development. There is an extensive international perspective at this conference with speakers, poster presenters, sponsors, and exhibitors from Europe, US, and Asia/Pacific.

<u>Europe Microfluidics 2020</u> supported by the organizing committee network of renowned scientific and professional expert such as Ronald So Professor, The Hong Kong Polytechnic University Hong Kong, Dimitris Drikakis, University of Starthclyde, Glasgow, United Kingdom, Ian R. McAndrew, Capitol Technology University USA, it provided a platform for collaboration among colleagues, vendors, Engineer and academia to reveal new innovations, solutions, ideas, and emerging technologies in the field of Microfluidics.

The report "microfluidics market by Application (Genomics, Proteomics, Capillary Electrophoresis, IVD (POC, Clinical Diagnostics), Drug Delivery, Microreactor, Lab Tests), Component (Chips, Pump, Needle), Material (Polymer, Glass, Silicon) - Global Forecast to 2023", The microfluidics market is expected to reach USD 27.91 Billion by 2023 from an estimated USD 10.06 Billion in 2018, at a CAGR of 22.6%. The growing use of polymers is expected to lower the price of microfluidic products. In addition to this, growing investments, favorable regulatory policies, and growth in healthcare and biotechnology industries in emerging Asian markets are expected to provide potential growth opportunities for players operating in the microfluidics market..

Global microfluidics Conferences going to be held during January, 2020 to December, 2020 at various cities in Europe (London, Edinburgh, Madrid, Rome, Milan, Berlin, Frankfurt, Zurich, Barcelona, Dublin, Valencia And Many More..!!!
