Abstract

Journal of Pharmacognosy and Natural Products is an open access journal which provides everyone with a forum to read articles without paying any charge. JPNP's main purpose is to provide current and latest medicinal plant growth. Herbal plants, chemical sweetener, lavender oil, natural food medicines, organic herbs, phototherapy, allergens, marine pharmacognosis, etc. are the main highlights of this journal.

Keywords: Pharmacognosy • Herbal plants • Natural food medicines • Organic herbs

Introduction

Journal of Pharmacognosy and Natural Products is an open access journal which provides everyone with a forum to read articles without paying any charge. JPNP's main purpose is to provide current and latest medicinal plant growth. Herbal plants, chemical sweetener, lavender oil, natural food medicines, organic herbs, phototherapy, allergens, marine pharmacognosis, etc. are the main highlights of this journal. It also organize some conference to make people aware of what is going on in the current scenario and how can we use microorganisms, plants for making new medicines or drugs.

I am glad to announce that in 2019 all the papers submitted will be published online within the specified timeline in volume 5. The printing of the issue has already been ordered and will be delivered within 30 days of the online issue. JPNP has added several new members of the editorial board this year who are highly qualified and talented in their respective sector. They always guide in their work and give best advice if any problem arise during article processing stages.

There are 3 issues in Volume 6 released in the press in 2020 where in issue 1 there are 3 research papers. Last year's impact factor of JPNP was average but in 2020 their page view was increased in May month. JPNP submitted a total of 16 papers of which more than half of them were approved in the preliminary screening and the remaining papers were rejected due to high plagiarism or mistake in last year's formatting. The articles which are published are of very good quality and high-resolution photographs inspire people to read it as well. JPNP posts the latest updates on their twitter account to make people aware of what's happening in the field of natural products obtained from plants, microorganisms, etc. which is shown on the home page of the journal. They provide all of the articles according to the current scenario's need and requirement. We are very pleased to be part of it.

I would also like to express my gratitude to all the writers, reviewers, the publisher, the JPNP advisory and editorial board, the office bearers and IPA secretariat staff for their help in bringing out yet another volume of JPNP and look forward to their unwavering support in bringing out the JPNP Volume 6 in due course. Approx. 10 Papers of which only a handful of papers were subject to peer review. Articles submitted are first going through the peer review period of 21 days. An article's total running time was further reduced to 40–45 days. The manuscript will be published within 7 days of it being accepted. I take this opportunity to acknowledge the contribution of all the journal members during the final editing of the published articles and their support in making it a successful publication house. This year the journal has earn money and reputation a lot.

The members of the journal always try to do something new and innovative changes there presentation of the articles so that the people would also take interest in the nature and used the natural products for medicinal purpose. They have started keeping it publicly accessible very recently and if anyone is interested in submitting their article they can go through the instructions provided on the homepage of the journal.
