

Prestigious Award for Young Research's at Computer Science 2020-Discovering New Exploration in Computer Science Field

Mustafa Khamis

American University of Sharjah, United Arab Emirates, E-mail: mkhamis@aus.edu

[Computer Science Conference Committee](#) is glad to announce "Global Summit on Computer Science and data management" during Sep 21-22, 2020 in Sydney, Australia by focus on the theme, "Modern Trends of Computer Technologies"

Computer science 2020 developments are maintaining their momentum. Computer science Conference program delves into strategic discussions.

Computer Science 2020 Young Scientist Awards:

[Computer Science Conference Committee](#) is intended to honor prestigious award for talented Young researchers, scientists, Young Investigators, Post-Graduate students, Post-doctoral fellows, Trainees, Junior faculty in recognition of their outstanding contribution towards the conference theme. The Young Scientist Awards make every effort in providing a strong professional development opportunity for early career academicians by meeting experts to exchange and share their experiences on all aspects of Computer science.

Young Research's Awards at computer science 2020 for the Nomination: Young Researcher Forum - Outstanding Masters/Ph.D./Post Doctorate thesis work Presentation, only 25 presentations acceptable at the young computer science2020 research forum.

About Hosting Organization: Conference Series

Conference Series llc LTD is the world's leading specialist in organizing Academic, Scientific and Business conferences, meetings, symposiums and exhibitions in different verticals and horizontals like Medical, Pharma, Engineering, Science, Technology and Business to promote scientific research. Every year we host more than 3000+ global events inclusive of 1000+ Conferences 1000+ Symposiums 1000+ Workshops in USA, Europe, Middle East and Asia with the generous support and cooperation from our 30000+ Editorial Board Members, 1000+ Scientific Societies. All the conference proceedings are published in the special

issues of our 700+ Open Access International Journals with the DOI provided by CROSSREF.

Targeted Audience:

- Scientists/Researchers
- President/Vice president
- Chairman's/Directors
- Professors, Data Analysts
- Data Scientists
- Experts and Delegates etc.
- Heads, Deans, and Professors of Computer Science Departments
- Research Scholar
- Engineers
- Consultants
- Lab technicians
- Founders and employees of the related companies

Global Summit on Computer Science and data management (Computer Science-2020) to be held on September Sep 21-22, 2020 in Sydney, Australia. Computer Science 2020 Conference, provides a great platform for the people who are enthusiastic at sharing their innovative ideas related to technology and provide an excellent international forum for sharing knowledge and their results in theories, technical thesis as a part of their research and elaborate their excellence with various dignitaries, multinational companies and gain the precious suggestions from real time industries, methodology and Applications of Computing.

The main objective of this Computer Science Meeting is to unite specialists and professionals from the scholarly community and industry to concentrate on Computer Science and Computer Engineering headways and setting up new coordinated efforts in their specified

stream of research. Unique research papers, cutting edge audits are welcomed for production in every aspect of Computer Science and Computer Engineering.

Why to Attend?

With members from around the world focused on Computer Science and data management this is your best opportunity to reach the largest assemblage of participants from the universities, colleges, research centers, societies, institutions, labs, associations, communities and companies etc. We want to make a worldwide meet in which data between researchers from the different controls can be effectively traded. The explanation behind bringing the general population at the meetings together is to catalyze empowering trades and connections between experts in different fields, from physical science to engineering. It will make new interdisciplinary systems and permit members to trade know-how and data to accomplish speedier and better results. The field of Computer Science and data management have not only helped the development in different fields in science and technology but also contributed towards the improvement of the quality of human life. The core aim of Computer science 2020 Conference is to provide an opportunity for the delegates to meet, interact and exchange innovative ideas in the various areas of Computer Science and data management. The joy of attending Computer science 2020 brings with it improvement and incremental growth in your approach to do things, in the broader manner to see things in international diversity.

Benefits:

- Young Scientist Award recognition certificate and memento to the winners
- Our conferences provide best Platform for your research through oral presentations.
- Learn about career improvement with all the latest technologies by networking.
- Young Scientists will get appropriate and timely information by this Forum.
- Platform for collaboration among young researchers for better development.
- Provide an opportunity for research interaction and established senior investigators across the globe in the field

- Share the ideas with both eminent researchers and mentors.
- It's a great privilege for young researchers to learn about the research areas for expanding their research knowledge.

Eligibility

- Young Investigators, Post-Graduate students, Post-doctoral fellows, Trainees, Junior faculty with a minimum of 5 years of research experience.
- Presentation must be into scientific sessions of the conference.
- Each Young Researcher/Young Scientist can submit only one paper (as first author or co-author).
- Age limit- Under 35yrs
- All submissions must be in English.

The main objective of this Computer Science Meeting is to unite specialists and professionals from the scholarly community and industry to concentrate on Computer Science and Computer Engineering headways and setting up new coordinated efforts in their specified stream of research. Unique research papers, cutting edge audits are welcomed for production in every aspect of Computer Science and Computer Engineering.

Importance & Scope:

Artificial Intelligence is the machines which are designed and programmed in such a manner that they and think and act like a human. Artificial Intelligence becomes the important part of our daily life. Our life is changed by AI because this technology is used in a wide area of day to day services. These technologies reduce human effort. Now in many industries, people are using this technology to develop machine slaves to perform the different activity. Using the machine for the work speed up your process of doing work and give you an accurate result. It is very likely that areas in which the universal intelligence of the human level is not needed will reach maturity and produce reliable high-quality products in the next decade. Efforts to improve quality and expand boundaries for text and video understanding systems, and to give home robots greater reliability and overall utility, will lead to systems of common sense linking learning and action together in all these modalities.

Especially given the massive growth of machine-readable data on human activities and the need for machines that understand human values if such machines are reliable and useful. Public and private sources of knowledge will become part of society.

Eligibility Criteria for Young Scientist Awards: Computer Science 2020:

The Computer Science 2020: Young Scientist Awards: is for all young Researchers, Research Scholars (Preferably PhD, Post Doc, and Post Graduates & Graduates) who has involved themselves into the R&D sector. The candidates should have minimum 3+ years of research experience and published minimum 3 research articles in international journals. Part time researchers can be considered subject to recommended by the research guide or any director level designated person from the organization.

Applications are invited on first come first basis. Only 25 nominations are accepted globally

Basis for Judging: Nominated candidates need to present their research or talk for 25-30 minutes in front of the panel members. Subject should be under the scope of the Computer Science 2020 conference. Selection will be on the basis of individual accomplishments, quality & standards of research, noble thought, research methodology, [innovative ideas](#), style of presentation, significance of the contribution to the field, originality, clarity, and future extended scope of the research and probability of bringing the research in terms of products/services into public domain.

Nomination:

We invite online applications from desired candidates, self-nomination or nominated by organizations (both private & public sectors)/research guides. The student must be the first author & the student's advisor should attach a statement that their contribution is primarily advisory.

Candidates applying for the Computer Science 2020: [Young Researcher Award](#) should send their resume, along with a letter of recommendation (from a research adviser/faculty/organization heads) to datamanagement@asia-meetings.com along with the online application at the Computer Science 2020 Award page.

Presentation: This award will be presented at [Sydney, Australia](#) during Computer Science 2020 conference.

Prize: We will recognize the awardee(s) with a Memento & Certificate of Appreciation followed by special incentive for the next chapter of the conference.

The prize-winning papers will be considered for publication in the supporting journals subjected to standard review procedures.

Opportunity will be given to be Student Ambassador for the subsequent future conferences.

For any further queries/concern, can reach the Computer Science 2020 secretariat at the below contact details:
