

Pulmonary Hypertension : Special Issue

Pulmonary hypertension (PH), is a complex and often misunderstood disease. The term PH means high blood pressure in the lungs. In “regular” hypertension (also known as high blood pressure or “systemic hypertension) the pressure in the arteries throughout the body is higher than it should be. This can be measured with a blood pressure cuff. In PH, the blood vessels specifically in the lungs are affected. They can become stiff, damaged or narrow, and the right side of the heart must work harder to pump blood through.

Journal of [Hypertension](#): Open Access, is a peer reviewed journal provides the rapid publication of articles in all areas related to [Hypertension](#), Hypertensive retinopathy, renal hypertension, Secondary hypertension, hypertension treatment, hypertensive heart disease, blood pressure, Pediatric hypertension, Angiotensin and Malignant hypertension etc.

Journal of [Hypertension](#) welcomes the submission of manuscripts that meet the general criteria of significance and scientific excellence. Coronavirus disease 2019 (COVID-19) is an infectious disease caused by severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2).The disease was first identified in 2019 in Wuhan, the capital of China's Hubei province, and has since spread globally, resulting in the ongoing 2019–20 coronavirus pandemic.

- Common symptoms include fever, cough, fatigue, shortness of breath and loss of smell.
- Recommended measures to prevent infection include frequent hand washing, social distancing, covering coughs, and keeping unwashed hands away from the face.

There is no vaccine or specific antiviral treatment for COVID-19. The World [Health](#) Organization (WHO) declared the 2019–20 coronavirus outbreak a Public [Health](#) Emergency of International Concern (PHEIC) on 30 January 2020 and a pandemic on 11 March 2020.

Special Issue Guidelines

Proposals are invited from all recognised experts in this area for creating special issues that fall within the scope of Hilaris groups Journal of [Hypertension](#): Open Access. Special issues should focus on "Risk of COVID-19 infection for patients with [Hypertension](#)". The aim of these special issues is to broaden the scope of Hilaris journals by encouraging publication of articles specific to high profile research topics from all areas of [Hypertension](#) and COVID-19.

Proposal Preparation

Special issues will be released on a monthly basis and proposals will be accepted accordingly. All proposals should include the following information:

- Title of the proposed special issue
- Purpose and current relevance List of topics to be covered
- List of potential contributors Guest Editor(s) and Reviewers Address, phone, e-mail, and fax of guest editors and reviewers
- Tentative deadlines for submission and review process (Timeline for submission, review, and final acceptance)

All proposals should be submitted to Editorial Tracking or send as an e-mail attachment to the Editorial Office at submissions@hilarispublisher.com For any queries, WhatsApp us at: +44-1474556909.

Role of EB Members

Review the special issue proposals for relevance to current research in the concerned field.

Recommend suitable proposals and their guest editors along with their biographies.

Once a proposal has been accepted by the EB members for creating a special issue, the corresponding guest editors will be responsible for handling and processing of the special issue articles.

Role of Guest Editor(s)

State the importance of the proposed special issue theme and explain how the special issue articles will contribute towards advancing the scope of the journal.

Suggest potential authors and invite them for contributing relevant articles for the proposed special issue.

Suggest a minimum of 3-5 reviewers for the manuscripts submitted towards the special issue.

Carry out all communications with potential authors and reviewers concerning author guidelines for manuscript preparation and reviewing.

Prepare a timeline and schedule for the release of special issue articles.

This should include a timeline for manuscript preparation, review process, and final submission.

Oversee the submission of final edited versions of the contributing articles along with the contact information of all corresponding authors.

Include a short editorial for the topic of interest written either by the guest editor or by any of the contributors.

Submission Process

Special issue articles can include both original unpublished research articles and review articles related to the specific theme.

Manuscripts will be accepted for publishing in the special issue only after getting approved by the peer review committee [selected by the guest editor(s)].

All the articles in special issues should strictly adhere to journal style and formatting.

Each special issue can be created with 10-15 articles.

Submission should be accompanied by a cover letter with reference to the concerned special issue theme.

Accepted manuscripts submitted before the deadline will be published within the given timeframe for the respective journal publication.

Once accepted and published, all special issues will be released under an open access system and will be freely available for reading, downloading, and printing.
