EDITORIAL NOTE

Surgical pathology is the study of tissues removed from living patients during surgery to help diagnose a disease and determine a treatment plan. Surgery is an invasive technique with the fundamental principle of physical intervention on organs/organ systems/tissues for diagnostic or therapeutic reasons.

Journal of surgical pathology and diagnosis (JSPD), initiated with an objective to Distinguish between benign (noncancerous) and malignant (cancerous) white blood cells, Detect early genetic changes that may result in cancer, Identify infectious agents in body tissues. Articles on pathology based on dermatopathology, cytopathology, hematopathology, neuropathology and pediatric pathology, techniques used for studying the surgery process.

Hilaris has been a pioneer in online open access publications to the international audiences in several areas of science where researchers all over the world publish their research discoveries and novel findings. As it is mentioned in the website, 'Journal of surgical pathology and diagnosis' focuses on areas such as cytopathology techniques, molecular diagnostics such as DNA/ RNA analysis for detection of infectious agents.

The journal accepts original research and concepts by researchers from all over the world. We hope that the researchers will enjoy a perfect platform to demonstrate the importance of their research work by publishing in this journal. I take this opportunity to thank Hilaris

group of publications for its mission in making the journey to take this on-line publication of the journal to a global audience. I believe that this journal will serve the scientific community better. I wish to encourage our scientific community to contribute their original research from to facilitate a continued success of the journal. I would also like to express my gratitude to all the authors, reviewers, the publisher, the advisory and the editorial board of JSPD, for their support in bringing out yet another volume of JSPD and look forward to their unrelenting support.

We know how much time and effort goes into writing a good peer review, and we deeply value the input of reviewers who volunteer their time and expertise to provide essential feedback that ensures the high quality of research published in each issue of the journal. We appreciate our peer reviewers for taking the time and effort necessary to provide insightful guidance, and we try to show our appreciation to our reviewers.

Finally, I would like to welcome you, our readers to this promising new journal of JSPD. Hope you will find amiable reading and challenging ideas from this journal. Happy and pleasant reading!
