

# Trends in Biomedical and Pharmaceutical Sciences

Dr. Li-Pin Kao\*

Department of Biomedical Engineering Scientist, USA

## Introduction

I am pleased to announce that Journal of Biomedical and Pharmaceutical Sciences (JBPS) is an international journal, which has given me the opportunity to present the journal's accomplishments in the year 2020. Hilaris is the journal's editor. The Journal of Biomedical and Pharmaceutical Sciences (JBPS) is an international journal, which gave me the opportunity to highlight the journal's accomplishments. It is also included in the Index Copernicus database, Google Scholar, and EBSCOhostTM databases. JBPS circulated the entire issue at the time, and the preprints were both posted and dispatched electronically within 30 days of the article's online publication. The Journal is targeted at academics, government officials, and other interested parties. at any stage of schooling, in evaluating studies and analytical articles Goals and Objectives The journal's aim is to publish the most creative and original scientific papers, review articles, and case studies in all areas of JBPS and skin care. Case papers, short correspondence, commentaries, photos, video posts, and other materials are available for free public access everywhere in the world.

The magazine is looking for high-quality academic publications and commentary on educational subjects. Science reviewers, blog posts, empirical papers, and thematic reviews are all published in the journal, along with state-of-the-art documents, statistical evaluations, meta-analytic research reviews, narrative reviews, and best-evidence synthesis. JBPS is a peer-reviewed, open-access academic journal devoted to instructional perspectives, approaches, and applications. The journal does not report on any specific age demographic. Articles on education are critical for people at all stages of growth. . Manuscripts that follow the general expectations of interest and analytical excellence are accepted by the Journal. The papers will be available in aroundmonth.

## Methods

Approval Peer review is required for all papers published in JBPS. Our publications' accuracy and evaluation standard are ensured by our dedicated professional and editorial team members from different pharmaceutical fields. JBPS initial papers, critiques, and letters to the editor are all published. Because each study that will be released publicly will span a period of 45 days from the time it is sent.

## Conclusion

The amount of time it takes to perform different procedures, such as quality control. , he time it takes to complete the research, peer review, and report writing varies between 4 and 5 weeks. Within 14 days, quality assessments and peer review processes are done, and the article is submitted only 7 days after the reviewers and editors have given their approval. The Journal of Educational Research publishes articles that either build on previously published findings or include novel ideas or conclusions that may have a significant influence on this area. ' like to thank all of the writers, reviewers, and other contributing audiences for their contributions to the final editing of the papers written, as well as the editorial assistant's assistance in the timely resolution of JBPS problems. I am grateful to them for inspiring me to think about how other people's practise and progress contribute to the growth of this journal.
