

Tropical and Infectious Diseases 2020 Conference Announcement

Ali A Ghweil

Professor, Department of Pharmacology & Toxicology, South Valley University, Egypt, USA, alimena@yahoo.com

Tropical Diseases 2020 Conference scheduled during **August 13-14, 2020 at Dubai, UAE**

Tropical and Infectious Diseases are a group of mostly infectious diseases that thrive among resource-poor populations, especially in tropical and rural climates. Their transmission and entrenchment is therefore favored by both geographical and social factors. The clinical history of tropical diseases is diverse. In some cases, severe impairments occur after years of silent infection so patients may have been unaware of the need to seek care. Specific public health actions and tools are applied to these diseases, mainly those which are aiming at removing the infective agent or the vector, thus reducing transmission. Some infectious diseases can be passed from person to person. Some are transmitted by insects or other animals. And you may get others by consuming contaminated food or water or being exposed to organisms in the environment.

[Tropical Diseases 2019](#) focused to explore the Innovative approaches for Infectious Diseases, Prevention and Control was scheduled on November 21-22, 2019 at Bali, Indonesia. The meet expected to provide great scope for interaction of professionals working in the field of [Infectious Diseases](#), Allergy, Pathology, Clinical microbiology, Infection Prevention and Control, Epidemiology, Microbiology, Public health around the globe, on a single platform.

We are glad to schedule the **3rd International Conference on Tropical and Infectious Diseases on August 13-14, 2020 at Dubai, UAE.**
