

## Young Researchers Forum -2021

---

After finishing of our previous conference, we are getting a huge response from the speakers\attendees and we happily announce that, we are organizing a conference on “**2nd World Congress on Veterinary Medicine**” was scheduled on May 26-27, 2021 |Webinar

2nd World Congress on Veterinary Medicine which includes prompt Keynote Presentations, Oral Talks, Poster Presentations, video presentations and Exhibitions. It aims to assemble the Researchers in Veterinary Medicine, Scientists, Industrialists and Students across the world to meet and discuss the future of Mechanical and Importance of Veterinary Medicine in today's world. Which slates during May 26-27, 2021 |Webinar to provide their research results, new ideas and practical experiences.

During this year's Conference, we tend to hope that you simply can grasp the chance to rekindle in-progress connections and spark a new one together with your colleagues from around the globe. With members from around the world centered on learning regarding materials science and research, this is often your single best chance to achieve the biggest assemblage of participants from the community.

### **Why to Attend:**

This is your best opportunity to reach the largest assemblage of participants from the mechanical and aerospace community. Live Events -- which include Keynote Sessions, Workshops, Online Video Sessions; Poster Presentations provides a unique approach for learning and career building.

Attendees will be having an opportunity to build networks with other Academics and Experts in Veterinary Medicine field from all over the world..

### **Highlights of the past Conference:**

Animal Health, Camel Science, Veterinary medicine, Veterinary research, Poultry farming, Livestock production, Animal welfare, Animal toxicology, Animal care and management, Veterinary surgery and Radiology, Animal microbiology, Animal vaccines, Animal nursing, Dairy farming, Animal cruelty, Aquaculture, Animal nutrition, Animal biotechnology, Animal Cloning & Transgenic animals, Mobile Veterinary Clinics , Animal reproduction, Meat science, Preventive healthcare clubs and Animal models testing plays a key role as one of the main supports of economic development and social well-being in Europe and indeed the world as a whole. The aim of the conference is to support global research communities by allowing clusters of Professor, Scientists, Researchers, Students and Business Delegates to regularly meet and converse topics with frontrunners in the field. These conferences cover miscellaneous top-ranked fields and budding aspects of vital and relatively broad subject filed. Establish conferences for knowledge sharing and providing the global platform to explore and learn new researchers in their respective fields. This veterinary conference focuses on the exponential growth taking place in the veterinary sector.

The Young Researcher Award is an initiative with the intention of supporting young researchers. This award recognizing for Masters\Ph.Ds.\ Post degree thesis work presentation who will present their

projects and thesis that has been implemented to improve long run excellence within the field of Veterinary Medicine. The selection Process will be done by the Organizing Committee.

**Other important skills:** you need to be a good scientist includes scepticism, creativity, problem-solving, self-management, and objectivity.

**Target Audiences:**

- Business/Practice Managers
- Veterinary Research
- Associations, Societies, and Universities
- Veterinary Epidemiology
- Camel Science
- Animal welfare
- Veterinary Toxicology
- Veterinary Surgery & Radiology
- Veterinary Microbiology and Microbial Diseases
- Veterinary Vaccines
- Veterinary Care & Management
- Veterinary Medicine
- Veterinary & Animal Science
- Poultry Production
- Veterinary Research
- Wildlife Management
- Animal Reproduction

**Rules of Eligibility:**

- Entrants must have been completed their PhD\MSc.
- The research described in the entrant's thesis must be in the field of Polymers\ Biopolymers.
- The prize will be awarded without reference to sex, race, or nationality.

- The topic must suites to the conference theme
- All presentations must be in English
- Updated Curriculum Vitae
- Submit an abstract as first author
- The candidate should give an undertaking that the paper being submitted has not been published in any journal or presented in the other Conference / Seminar / Symposium or submitted for consideration of any award.
- Young Scientist can present only one paper in any session.

**Importance:**

- To recognises the fundamental importance of scientific research in the development of our understanding of the growth of forests and their value to society and our planet.

**Benefits:**

- Young soul Award recognition certificate and souvenir to the winners
- This forum can provide pertinent and timely info to UN agency those that people who} conduct analysis and people who use and take pleasure in analysis
- Showcase your analysis through oral shows.
- Interact and share concepts with each peers and mentors.
- Learn regarding career improvement with all the newest technologies by networking.
- Young Scientists can get applicable and timely info by this Forum.
- The forum can offer a chance for collegial interaction with alternative young investigators and established senior investigators across the world.
- Platform for collaboration among young

- researchers for higher development
- Provide a chance for analysis interaction and established senior investigators across the world within the field
  - Opportunity for young analysers to be told regarding the research areas of their peers to extend their capability as multidisciplinary researchers

The [Young Research Forum](#) offers for all young researchers and scientists and students for possibility to meet and discuss about their own research topics and methodologies to share and develop their ideas, learn from each other and gain knowledge from eminent speakers.

### **Role of Young Scientist:**

Young scientists will play an important role in today's research and innovations systems. Understanding how young researchers can achieve and contribute to the knowledge landscape, and what obstacles they encounter within the process across the globe.

Participation in the symposium is open to all graduate students who are graduates in field of Polymer Science from certified universities. Applicants must be recent graduated students.

Our Conference Series categories seek to acknowledge Scientists, Researcher, Professor, Industrialists, and Students in various scientific fields who are making an outstanding contribution to the world of Science for the better and healthy future.

It would be an exposure to the young and enthusiastic researchers to explore the leading edge research and technology within the interdisciplinary approach. YRF will also give

them an opportunity to strengthen their research also as academic network with other experts both in their core and interdisciplinary areas.

The application package must include:

- Updated Curriculum Vitae
- Course completion certificate
- Paper work for presentation
