

Writing Research Paper: Top Tips and Tricks!

Kshitij Shinghal*

Associate Professor and Dean Academics, Department of Electronics and Communication, MIT, Moradabad, Uttar Pradesh, India

It is my pleasure to write this editorial for journal of Journal of Biosensors & Bioelectronics. Here are some quick tips for writing a quality research paper and getting it published in a scholarly, academic journal. First thing to consider while submitting a research article to a journal is always stick to the area and scope of the journal i.e., explore all candidate journals and find out following details about the journal: Aims and scope, types of accepted articles, readership etc., and choose and submit accordingly. Next thing is to carry out exhaustive literature survey of the abstracts of recent publications to ensure novelty and originality of your work. Always adheres to publication ethics and avoid plagiarism of others' work. Also, avoid multiple publication of the same work, verbatim copying of large portions of previously published parts of own research, never submit your manuscript to more than one journal at a time. Always remember to cite and acknowledge others' work appropriately. Try to make it a point, only list co-authors who made significant contributions to your research. Finally, the most important tip is to follow the journal's guide for authors and try to stick to the guidelines for author's while preparing your manuscript, editors do not like wasting time on poorly prepared manuscripts. Writing a research paper is a very important step for strong career growth, like all good skills it also takes time to build up, it gets easier with practice and with time it comes as a natural flair. So, treat it accordingly and don't

wait any longer. Start writing and submitting your academic research now.

The Journal of Biosensors & Bioelectronics has become a recognized platform for learning, disseminating and exchange of ideas by and for professionals in the field of Biosensors & Bioelectronics research industry. Further, I want to thank my Editorial Board for their tireless contributions and efforts to make Journal of Biosensors & Bioelectronics a novel destination for researchers to publish their work. Thanks to our reviewers also, both local and international, who provided invaluable reviews to ensure only high quality peer reviewed articles are selected for publication only after being revised appropriately or in some cases rejected. The continuing success of this journal gives us a sense of pride and achievement. Please contribute articles to this journal in a timely manner, to ensure it gets published timely and becomes part of this important forum for the exchange of ideas and knowledge which will ultimately translate to better technological exchange of information among peers. If you have any questions or comments about the Journal please contact the Editor board from <https://www.omicsonline.org/contact-biosensors-bioelectronics-open-access.php>. The Journal is available online, please visit the following website: <https://www.omicsonline.org/biosensors-bioelectronics.php>.
