

## Young Research Forum – Young Scientist Awards Euro SatComm 2020

**Firas Ousta**

*Research Scientist, CISIR, Universiti Teknologi PETRONAS, University in Seri Iskandar, Malaysia, Email: foustaa@ieee.org*

Electrical Engineering is one of the top specialties for Engineering and Technology conferences. Despite tremendous advances in [Electrical](#) and Aerospace Engineering, Satellite and Space innovations we are glad to announce our Euro SatComm 2020, Satellite Expo and Wireless Conference" which is slated on February 12-13, 2020 at Paris, France. Connecting the Academic professionals, Communities and Associations, Researchers, Directors and Students for tomorrow's Satellite and Space innovations and developments and also providing the Electrical, Satellite Technology Companies, Aerospace industries with highly targeted interactive Marketing, Education, Content, and Aerospace Research Solutions.

Engineering meetings and Conferences play an important role in the process of Electrical, Aerospace Engineering and Technology which are one of the primary venues for Academicians, Scientists, Researchers, Students, Scholars, Researchers, Industrial and Business professionals to present and receive feedback on research, trends, developments, manufacturing and technology before publication, to forge collaborations, and to network and share research ideas.

Euro SatComm 2020 is welcoming chosen people for the Wireless [Communications](#) Young Researcher Award. This is another honor that perceives early vocation splendor and is available to PhD understudies and scientists inside the initial five years of finishing their PhD. Different selections are welcome however self-assignments will be prohibited.

Young Researcher Sessions are sorted out at each IEEE Engineering meeting to give an extraordinary stage to Young Researchers and Investigators for displaying their most recent

research tasks, thoughts and the fervor that goes with them. Regularly these tasks and their discoveries push the limits of therapeutic and logical research with colossal advantages and more current bearings to advance helpful research. Young Researchers from Universities, Institutes, and different Industries are welcome to exhibit a short oral introduction during these discussions, featuring points and what they plan to accomplish pushing ahead.

The point of the Young Researchers Forum is to move and unite Young specialists in the field of [Wireless Communications](#). The gathering gives a lively spot to talking about potential and progressing research in any stage, from thought to results. The discussion endeavors to give an inviting situation to enable Young specialists to get input on their work, trade understanding, pose inquiries, investigate pathways open to them. What's more, the gathering invigorates collaboration between Young specialists, experienced scientists and industry. Each creator, notwithstanding analysts important to their work, will be doled out a mechanical guide who will likewise survey and recommend upgrades to their entries.

Participation is available to any individual who thinks about himself/herself a 'Young' specialist, needing to share examine thoughts and (primer or develop) results with their friends and searching for a chance to move and be roused and find out about research ways. Ph.D. applicants, Young scientists in any phase of their examination (counting college understudies), Young analysts in industry look into pathways are on the whole most invited to partake. Likewise, we explicitly welcome Ph.D. up-and-comers and Young specialists displaying their work in the Euro SatComm 2020 to take an interest in this gathering.

The possibility of the occasion is for young specialists to display new and continuous work, and to get useful criticism from companions and senior analysts. Along these lines, the work ought not to have showed up in print in an officially checked on procedures volume by the time of submission.

The Young Research Forum is for postgraduate understudies and early profession scientists from any field identified with advanced general wellbeing and more extensive general well-being that fuses computerized advances and development, just as their managers. It has been explicitly intended to furnish you with the chance to exhibit your work in a benevolent, steady discussion and to get input from guides and companions.

### **Eligibility**

- Young Investigators, Post-Graduate understudies, Post-doctoral colleagues, Trainees, Junior workforce with at least 5 years of research understanding
- Introduction must be into logical sessions of the gathering.
- Every Young Researcher/Young Scientist can submit just one paper (as first creator or co-creator).
- Age limit-Under 35yrs
- All entries must be in English.

### **Benefits of Participating in Young Research Forum**

Young Scientist Award recombination endorsement and keepsake to the victors.

Our gatherings give best Platform to your examination through oral introductions.

Find out about profession improvement with all the most recent advancements by systems administration.

Young Scientists will get proper and auspicious data by this Forum.

Stage for coordinated effort among Young specialists for better advancement.

Give a chance to look into communication and built up senior specialists over the globe in the field.

Offer the thoughts with both famous specialists and tutors.

It's an extraordinary benefit for Young specialists to find out about the examination zones for extending their exploration information.

Euro SatComm 2020 gives best stage to grow your system, where you can meet researchers, specialists and CROs from around the globe. It's your opportunity to snatch the chance to join Euro SatComm 2020 for advancing your examination article and to encourage lofty honor in all classifications. In this notoriety, we search forward for your commitment and shocking devotion to make our Euro SatComm 2020 increasingly effective.

### **Topics**

Areas of interest include all aspects of Wireless and Satellite Communications engineering, as given by the scope of the Euro SatComm 2020 conference.

### **Selection Criteria**

Exhibit your exploration through oral introductions.

Find out about career advancement and the most recent research instruments and innovations in your field.

This gathering will give appropriate and opportune data to the individuals who lead inquire about and the individuals who use and advantage from look into.

Build up an establishment for joint effort among Young analysts.

The gathering will give a chance to collegial connection with other Young specialists and set up senior examiners over the globe.

Interface and offer thoughts with the two friends and tutors.

Open door for Young analysts to find out about the examination zones of their friends to build their ability as multidisciplinary specialists.

---

Effectively convey data and advance the advantages of training and career matters.

### **Presentation and Discussion**

A Presenter will give her/his discussion their examination. Following the introduction, the discussants allotted to each paper will offer brief remarks (5 minutes), including a blend of:

How the paper made the discussant contemplate her or his very own work

How the paper is connected somehow or another to the discussant's own work

Some guidance for the creators in proceeding with their work

Distinguishing proof of coordinated effort openings or collaborations

Dialog addresses dependent on the displayed paper.

### **Awards & Rewards**

All selections are by the Scientific Committee of the Euro SatComm 2020.

The 'Young Researcher Award' is awarded to the best oral presentation.

Young Research's Awards at Euro Satcomm 2020 for the Nomination: Young Researcher Forum - Outstanding Masters/Ph.D./Post Doctorate thesis work Presentation, only 25 presentations acceptable at the Euro Satcomm 2020 young research forum. .
