

# Young Researchers Forum-2021

**Theresa Sarah**

Veterinary 2021 aims to assemble the Researchers, principal investigators, specialists, and researchers operating beneath academe and health care trade, Business Delegates, Scientists and students across the world to attend 16th International Veterinary Congress during June 14-15, 2021 at London, UK to provide their research results, new thoughts, and practical development experiences. We invite all the participants from all across the globe to attend this conference which includes prompt keynote presentations, poster presentations, oral talks and exhibitions. We tend to hope that you just can grasp this the educational occasion to revitalize the enduring connections and flash with newspapers around the globe. Veterinary 2021 will have many lectures, Keynote lectures and a short note by eminent personalities from around the world. During this year's Conference, we tend to hope that you simply can seize the chance to rekindle in-progress connections and spark a new one together with your colleagues from around the globe.

Veterinary medicine is the branch of medicine that deals with the prevention, control, diagnosis, and treatment of disease, disorder, and injury in animals. Along with this, it also deals with animal rearing, husbandry, breeding, and research on nutrition and product development. The scope of veterinary medicine is wide, covering all animal species, both domesticated and wild, with a wide range of conditions which can affect different species.

Veterinary medicine is widely practiced, both with and without professional supervision. Professional care is most often led by a veterinary physician (also known as a vet, veterinary surgeon or veterinarian), but also by Para veterinary workers such as veterinary nurses or technicians. This can be augmented by other paraprofessionals with specific specialisms such as animal physiotherapy or dentistry, and species relevant roles such as farriers.

Veterinary science helps human health through the monitoring and control of zoonotic disease (infectious disease transmitted from non-human animals to humans), food safety, and indirectly through human applications from basic medical research. They also help to maintain food supply through livestock health monitoring and treatment, and mental health by keeping pets healthy and long-living. Veterinary scientists often collaborate with epidemiologists and other health or natural scientists, depending on type of work. Ethically, veterinarians are usually obliged to look after animal welfare. Veterinarians diagnose, treat, and help keep animals safe and

healthy.

## Target Audiences:

- Business/Practice Managers
- Veterinary Research
- Associations, Societies, and Universities
- Veterinary Epidemiology
- Camel Science
- Animal welfare
- Veterinary Toxicology
- Veterinary Surgery & Radiology
- Veterinary Microbiology and Microbial Diseases
- Veterinary Vaccines
- Veterinary Care & Management
- Veterinary Medicine
- Veterinary & Animal Science
- Poultry Production
- Veterinary Research
- Wildlife Management
- Animal Reproduction

A warm welcome to the 16th International Veterinary Congress which is going to be held during June 14-15, 2021 London, UK, brings upon a new platform to share and discuss all the innovations in the Veterinary Science. As we tend to enter 2021, one has to look no farther than the daily news reports to understand the continuing burden of several diseases. Veterinary 2021 not just make a phase to exchange estimations to the big affair of people, yet also to exert one to try to, spread concentrated and research advances in the field of Veterinary Science. Following the success of the previous conference 15th International Veterinary Congress, we are honoured to invite you to 16th International Veterinary Congress, which will be held, London, UK. Our aim is to Veterinary Science at a room of like-minded people. The Veterinary 2021 will be a progressive, compelling and informative conference. The meeting will continue to serve as a distinct platform, where the foremost compelling and controversial topics facing clinicians within the field are presented during a fascinating and interesting debate forum.

## Benefits:

- Young soul Award recognition certificate and souvenir to the winners
- This forum can provide pertinent and timely info to UN agency those that people who} conduct analysis and people who use and take pleasure in analysis
- Showcase your analysis through oral shows.
- Interact and share concepts with each peers and mentors.
- Learn regarding career improvement with all the newest technologies by networking.
- Young Scientists can get applicable and timely info by this Forum.
- The forum can offer a chance for collegial interaction with alternative young investigators and established senior investigators across the world.
- Platform for collaboration among young researchers for higher development
- Provide a chance for analysis interaction and established senior investigators across the world within the field
- Opportunity for young analysers to be told regarding the research areas of their peers to extend their capability as multidisciplinary researchers

## Eligibility:

- Young Investigators (e.g. Post-Graduate students, Post-doctoral fellows, Trainees, junior faculty) area unit the main target of this event
- The topic should work into scientific sessions of the conference.
- Each individual participant is allowed to submit only 1 paper (as 1st author or co-author).
- None of the authors ought to have senior position or school position.
- Participants ought to be below the age of thirty three years.
- All submissions should be in English.
- Opportunity for young analysers to be told regarding the research areas of their peers to extend their capability as multidisciplinary researchers
- Actively distribute info and promote the advantages of education and career matters.
