

## Young Scientist Awards Oil and Gas 2021

**Leonardo Fran**

*Baker Hughes, Upstream Chemicals, Sugar Land, Texas*

Oil and Gas 2020 provides a platform for researcher scholars, scientists and academic people to share and globalize their research work while the participants from industry/ business sectors can promote their products thus felicitating dissemination of knowledge. We anticipate more than 300 participants around the globe with thought provoking keynote lectures, oral and poster presentations. The attending delegates include Editorial Board Members of related journals. The scope of Oil and Gas 2021 is to bring the Future Challenges for Oil and Gas Exploration and Consumption.

Oil and Gas 2021 will keep abreast of all the latest developments – geopolitical, industrial and technological updates. Throughout the two-day conference, attendees will hear from International leaders on how technology is changing day-to-day business throughout the industry. It provides a unique platform for networking with peers and learning from speakers that are experts in oil field technology.

Global Oil and Gas Expo Conference for Oil and Gas Industry focuses on the most critical challenges for Oil and Gas Exploration and Consumptions. This conference theme, explore possibilities, will guide discussions on supporting a thriving energy sector through a series of thoughtful keynotes, interactive panels, and hot topic sessions. Learn about how innovation and new technologies can improve operations and support business diversification, as well as streamline policy, compliance and technical updates. You will also be able to grow your network and connect with peers and experts in oil and gas from across the country.

### Importance & Scope

Oil and Gas attains greater global significance as the world economy has been developing with oil as its lifeblood for over a hundred years. Oil is directly responsible for about 2.5% of world GDP, but accounts for 1/3rd of humanity's primary energy supply (>5 terawatts out of 15 terawatts total). It's over half if you include natural gas. Oil/gas powers 100% of all transportation, within a few significant figures of rounding error. There is no doubt in my mind whatsoever that modern civilization would collapse in a matter of months if oil stopped flowing. It is hard to imagine industrial operations or even private activities without oil and gas – anywhere in the world. Not only do they supply energy for heat and power, they are also found in everyday items, such as medicines, plastics, and clothing

Conference series organize 3000+ Global Events inclusive of 2000+ Conferences, 500+ Workshops and 500+ symposiums on various topics of Science and Technology across the globe with support from 1,000 more scientific societies and Publishes 900+ Open access journals which contains over 50,000 eminent personalities, reputed Scientists as Editorial Board Members.

Prestigious Award for Young Research's at Oil and Gas 2020 - Discovering New Exploration in Petroleum field. Oil and Gas 2021 developments are maintaining their momentum. Oil and Gas Conference program delves into strategic discussions.
