

Editorial Note

Dear readers,

The Molecular Biology: Open Access Journal (MBL) was inaugurated in 2012 and has continued publishing successfully with Volume 9 in 2020.

Journal highlights

The Journal has published in excess of 230 interesting papers in various systems of a cell, including the interactions between DNA, RNA and protein biosynthesis, the transcription factor as well as learning how these interactions are regulated.

Topical issues have covered biology and chemistry, particularly genetics and biochemistry, Molecular biology and evolution, Molecular system biology, Cell biosciences, Application of MB, Molecular biology products and market analysis, Mass spectrometry molecular biology, Structural molecular biology, Molecular biology of infectious diseases, etc.

Acknowledgement

We would like to take this opportunity to thank current editorial board members for their ongoing commitment to the standards to which the journal aspires, these experts expand our expertise in core areas. We have significantly expanded our pool of excellent reviewers, most papers now have at least two reviews and their quality has been steadily improving. At present we would like to convey our special thanks to the reviewers: Shamroop kumar Mallela (University of Miami), Li-Pin Kao (Purdue University), Acharya Anushree (Columbia University), Jerzy Beltowski (Medical University Lublin), Roopadarshini Veerappa (University of Texas), Pavan Rajanahalli (University of Tampa), etc., for their continuous support towards the Journal growth.

Indexing

We use almost all the social networking sites such as Twitter, LinkedIn and Facebook to promote and showcase the articles published in our Journal which helps to increase the visibility of articles in core subject.

The Journal is abstracted and indexed in Index Copernicus, Google Scholar, Genamics JournalSeek, ResearchBible, RefSeek, Geneva Foundation for Medical Education and Research, Hamdard University, EBSCO A-Z, OCLC- WorldCat, Publons. The Journal will support authors by posting the published version of articles by NIH grant-holders to PubMed Central immediately after publication. As a member of Publisher International Linking Association, PILA, Molecular Biology (of Hilaris SRL) follows the Creative Commons Attribution License and Scholars Open Access publishing policies.

Social media

Future strategy

As part of our future strategy we would like to offer publication space associated with current pandemic Covid-19. Our intention is to broaden the scope to include papers on Coronavirus research.

We look forward to work with all of you as we continue to make our Journal Molecular Biology: Open Access a success and we welcome your submissions, as well as feedback as authors, readers, and reviewers of the journal.

The authors can register, submit manuscript, track its progress and receive specific emails whenever a significant step is made through the editorial processing. Reviewers can access, read and download full length manuscript and submit their opinions. Editors can oversee and operate the entire cycle of screening, revisions, editing of the submissions. Publishers can monitor the submissions and channelize production operations such as copy editing, style sheet implementation and author proof generation.

Manuscripts can be submitted online via [Molecular Biology](#) or as an e-mail attachment to the editorial office at molbiol@journalsci.org. MBL is using Online Review and Editorial Tracking Systems for quality review process and the authors can submit manuscripts and track their progress.
