

Journal of Applied and Computational Mathematics

The journal has been started in the year 2012 and it released its first volume in the same year. Till now, the journal has released 8 volumes by the end of 2019 and is successfully running its 9th Volume. The Journal is an open access publication that features scientific works of considerable significance and impact in all branches of mathematics that concerns with mathematical methods that are typically used in science, engineering, business, and industry. Computational mathematics involves mathematical research in areas of science where computing plays a central and essential role in emphasizing algorithms, numerical methods and symbolic methods with the concept of ubiquitous computing. The journal provides an Open Access platform to analyse new computational and applied techniques for solving the scientific or engineering problems.

Algebra
Ant Colony Optimization
Balance Law
Computational Model
Convection Diffusion Equations
Differential Transform Method
Fuzzy Boundary

The classification extends to the above and its related topics too.

Some of the articles released in 2019 are as follows:

1. Uniqueness of Four Covering Arrays Equivalent to Error-Correcting Codes
2. Existence and Uniqueness of Asymptotically w -Periodic Solution for Fractional Semilinear Problem
3. Understanding the Implication of Some Counter-Terrorism (CT) Measures: A Mathematical Perspective

The journal has released the conference details relating to the journal in December 2019. In the same way, the Journal expects to cover all the above classification topics for the year 2020 along with the present research in this field.

Social media/digital marketing

The journal always was in contact with the scientific group of the world through its mails, social media networks and its digital platforms. Some of the best ways to be in contact with the audiences' are:

1. Twitter postings: Regularly posting the articles, trends, updates of the journal. They can be visible at @ComputationalJ.

2. Posting Google Analytics data in the website.
3. Using LinkedIn and Facebook for regular updates.
4. Regularly being in contact not only through mails but also through WhatsApp.

The complete details about the journal can be seen at:

<https://www.hilarispublisher.com/applied-computational-mathematics.html> and for contacting us, mail us or WhatsApp us.

So, as an Editor, I invite all the extended dignitaries in this field to submit their articles for bringing this research/expertise to the global scientific community.

Regards

Kyriaki Tsilika
