

Editorial Highlights for Journal of Neurological Disorders

Athanasios K. Petridis

Department of Neurosurgery, University of Schleswig Holstein, Germany

Abstract

We are grateful for editors and reviewers of the Journal of Neurological Disorders, and we also very much appreciate your suggestions, which have been very helpful in improving the manuscript. We also thank the reviewers for their careful reading of our text.

Editorial

All the suggestions of the reviewers have made it necessary to increase the number of citations and help us to increase the impact factor of the journal 2.1. We have gone from 1000 to 2000 views, and also we have published several enlightening articles. The Journal of Neurological Disorders is rapidly progressing. Being in the field of Neurological Sciences (Neurosciences, Neurology, neurosurgery, Psychiatry) we try to publish papers of excellent quality. Until now this aim was reached and we are looking forward to keep track on our achievements. The field of Neuroscience is progressing rapidly. In the field of Neurosurgery, where I come from, and especially in vascular neurosurgery, the last years were very prosperous. Development of new imaging methods help us understand the pathophysiology of aneurysm development and the risk of rupture. Such techniques are i.e. the "black blood MRI", which shows contrast enhancement of aneurysm wall as a sign of aneurysm instability. Computational fluid dynamics, flow analyses and new surgical and endovascular techniques have been published in great succession through the last 2 decades. The need to publish our scientific results plays a crucial role in understanding pathologies of this very complex system of neurons and synapses. We welcome you to keep supporting our efforts to

publish manuscripts of highest quality which could only be done with your help.

All published articles of this journal are included in the indexing and abstracting coverage of:

Index Copernicus, Open J Gate, Academic Keys, SafetyLit, China National Knowledge Infrastructure (CNKI), Electronic Journals Library, RefSeek, Hamdard University, EBSCO A-Z, SWB online catalog, Virtual Library of Biology (vifabio), Publons, Geneva Foundation for Medical Education and Research

The journal indexed 18 articles in Pub Med. Impact Factor: 2.1; ISSN: 2329-6895.

During the calendar year of 2019, JND received a total of 48 manuscripts, out of which 34 articles were published. Some were rejected in the preliminary screening due to plagiarism or being out of the format and peer review process. Articles were published from authors all around the world. Globally articles have been accessed by the research scientists and also cited.

During these years the editors, reviewers and honourable authors contributed their valuable services towards contribution as well as publication of articles, and their valuable reviewer comments will be beneficial to publish quality of article in the Journal.
