Editorial Note

The Journal of Molecular and Genetic medicine gives you continuous coverage of all genetic and molecular aspects of medicine as well as in-depth documentation of genetic analysis within the current context of genotype/ phenotype correlations.

At-Home Coronavirus Treatment

If your symptoms are mild enough that you can recover at home, you should take rest. It can make you feel better and may speed your recovery. Stay home. Don't go to work, school, or public places. Drink fluids. You lose more water when you're sick. Dehydration can make symptoms worse and cause other health problems. Monitor. If your symptoms get worse, call your doctor right away. Don't go to their office without calling first. They might tell you to stay home, or they may need to take extra steps to protect staff and other patients. Ask your doctor about over-the-counter medicines that may help, like acetaminophen to lower your fever.

Journal of Molecular and Genetic Medicine main aim is to facilitate scientific communication in a clear, concise and objective manner, while striving to provide prompt publication of original works of high standard quality.

All published articles of this journal are included in the indexing and abstracting coverage of Index Copernicus, Google Scholar, Cite Factor,
