

9th International Conference on Neurology and Neuroscience

C.P Abdolrasoul Aleezaadeh

University of Applied Sciences and Technology, Iran, E-mail: abdolrasoul_alizadeh@yahoo.com

The **9th International Conference on Neurology and Neuroscience**, slated on the dates **September 28-29, 2020** in the beautiful city of **Edinburgh, Scotland**.

Experts are including research scholars, doctors, professors, students, pharmacists, industrialists, businessmen and even social activists working in and around the field of [Neurology](#) and [Neuroscience](#) gather annually in this innovative platform to network and discuss their recent research.

A panel of senior and most respected scientists and researchers will form the Expert Organizing Committee of the conference, scrutinizing the abstracts and profiles of the entrants in order to maintain the outstanding transcendence of the conference from the past 8 episodes.

With participants from all over the world presenting signature key note talks, plenary sessions, workshops, interactive brainstorming sessions, special sessions and not to forget the Best Poster Award competition for postgraduate, graduate and YRF candidates, the next series is all set to take over and make history. So, save the dates in your calendar for the most exciting, informative and engaging event in the field of Neuroscience where you will get to meet, discuss, share your research ideas and network with world-renowned scientists. Get set for experiencing Neuroscience on a whole new level!

Content

Every brain is different, and that's what makes every human being unique and defines who it is. Man has been attempting to understand how this amazing brain works since time immemorial, hypothesizing and finding thousands of awe-inspiring hypotheses and evidence and is still on the quest to find out more. With more and more discoveries and technological advancements, the thrill in the field has only increased all the more over the past century. Neuroscience has now become a separate degree course in bachelor's and master's studies, engaging more students and professionals in the field to pursue Neuroscience research as a career.

The series of International Conferences on Neurology and Neuroscience is another such pursuit for Allied Academies to understand this exciting branch of science. Allied Academies has built an impressive track record of a positive and competent conference reputation with over 20 years of experience in organizing international conferences covering almost every area of life science.

As the leading organisation, Allied Academies works tirelessly to ensure that everything you need to stay up-to-date in neuroscience can be found in this conference. We totally understand that your time is limited and valuable. Therefore Allied Academies has designed [Neuroscience Summit 2020](#) in the best way so that you find opportunities to connect with other medical professionals and catch up with the latest advancements in medicine making the best use of your valuable 2 days.

The 9th International Conference on Neurology and Neuroscience (Neuroscience Summit 2020) is all set to be held in the city of Edinburgh, Scotland on September 28-29, 2020, after the successful completion of the 8th season. This year's conference is centred around the meaningful theme "Explore Contemporary Advancements in Neurology and Neuroscience" and attracts 100+ participants like every year. This is an open call-for-abstract for all neurology, neuroscience, psychology researchers working in and around the field, in keeping with the preparations that are going on in full swing.

Neuroscience Summit 2020 has also been crafted with utmost care this year, covering a wide range of critically important sessions for speakers to discuss, including Neuroscience, CNS, Neurological Disorders, Cognitive Sciences, Psychology, Neurophysiology, Neurogenetics, Neuropathology, Neuroimmunology, Neuropsychiatry, Neuroradiology and Imaging, Neurosurgery, Neuro-oncology, Neuropharmacology, Neuro Feedback, Nursing in neuroscience and Case studies and ethical issues, to provide the best conferencing experience for all our participants. Abstract submission and Registration slots have been opened for all.
