To whom to may concern

Montreal, 18 July 2013

Publishing in *Journal of Human Genetics & Embryology* was a very positive experience. I was impressed by the fast submission process as well as the clear and professional peer review process which helped to improve the manuscript. It has received the very high viewing rate. As an editor and reviewer, I find that the editorial team was superb helpful. It was a great pleasure to cooperate with such qualified and friendly team. Since having been impressed by the journal's contents too, I would definitely recommend the journal to other colleagues in the field!

I strongly recommend *The Journal of Human Genetics & Embryology* to be indexed in PubMed Central. The Journal staff and editorial board members have worked very hard for the journal to establish its high professional standing.

Cheers,

Yue Zhang
